Earthquake Location Lab Answers

CALCULATING LAG TIMES. Remember that seismographs record three types of earthquake waves which have been described to you in class: 1) P-waves (also called push-pull or compressional waves), 2) S-waves (also called shear or shake waves), and 3) L-waves (also called long or love waves). Each of these waves travel at different velocities (speeds), even though they are generated simultaneously by ...

Lab 10 - Earthquake Epicenter Location

Students learn how engineers characterize earthquakes through seismic data. Then, acting as engineers, they use real-world seismograph data and a tutorial/simulation accessed through the Earthquakes Living Lab to locate earthquake epicenters via triangulation and determine earthquake magnitudes. Student pairs examine seismic waves, S waves and P waves recorded on seismograms, measuring the key ...

Earthquakes Living Lab: Finding Epicenters & Measuring ...

Lab 5: Earthquakes - Answers Objective The objectives of this lab are to learn how to locate the epicenter of an earthquake using seismographs and to examine the relationship between plate tectonics and earthquake locations. Introduction and Theory Most earthquakes are caused by the movement of tectonic plates along faults at plate boundaries. Stress is built up over time when plates become ...

Lab 5 - Earthquakes - Answers (1) - Lab 5 Earthquakes ...

Within minutes after an earthquake, seismologists located in San Francisco, Denver, and Seattle would record the times of the arrivals of the P-wave and S-waves. You would use this data to zero in on the exact location of the earthquake's epicenter. Materials: Drawing compass with pencil, ESRT page 11 Procedure: Earthquake 1: Part 1.

LAB: Locating An Epicenter - Norwich High School

Lab 12 - Earthquakes & Seismograms name Use the seismograms, and P to S-wave arrival-times to determine the magntitudeof an earthquake and locate the epicenter. Determining the Richter Magnitude of an Earthquake Figure 12.1 shows a seismogram recording of an earthquake. Follow the procedure below to determine the Richter Magnitude.

Solved: Lab 12 - Earthquakes & Seismograms Name Use The Se ...

The Earthquakes Living Lab gives students the chance to track earthquakes across the planet and examine where, why and how they are occurring. Using the real-world data in the living lab enables students and teachers to practice analyzing data to solve problems and answer questions, in much the same way that scientists and engineers do every day.

Earthquakes Living Lab: Locating Earthquakes - Activity ...

In this assessment, you will read and interpret various seismograms to determine the location of an earthquake. You will also determine the magnitude of the earthquake. When you are finished you will be presented with a Certificate of Completion making you a Virtual Seismologist. Remember to access the tips and hits at the bottom of the page.
