Dividing Monomials If your middle school student is struggling with math, help him learn about monomials with this series of worksheets. A monomial is a product of a power of variables.

Dividing Monomials - Algebra Worksheets | Education.com

When you divide two monomials you need to divide their coefficients and then divide their variables. In case of exponents with the same base, you need to subtract their powers.

Exponent's rules: $x^a \times x^b = x^{a+b}$, $x^a \div x^b = x^{a-b}$, $(x^a)^b = x^{a \times b}$, $x^a \times x^b = x^{a+b}$, $x^a \div x^b = x^{a-b}$, $(x^a)^b = x^{a \times b}$, $x^a \times x^b = x^{a+b}$, $x^a \div x^b = x^{a-b}$, $(x^a)^b = x^{a \times b}$.

0.05ab d. $-19x + 5$ e. $-19x$ Yes Yes Yes
No No . Today, you will learn three new properties that will help you multiply monomials. Multiplying monomials is often used when comparing a characteristic of several items, such as acidity of different fruits.

7-1 Multiplying Monomials

Dividing Monomials How Do We Divide When Exponents are Involved? As you've seen in the prior lessons, when we work with monomials, we see a lot of exponents. You've discovered the laws of exponents and the properties for multiplying exponents, but what happens when we divide? That is the question we are going to answer in this lesson.
