Could our sense of who we are really turn on a sliver of DNA? In our multiethnic world, questions of individual identity are becoming increasingly unclear. Now in ABRAHAM'S CHILDREN bestselling author Jon Entine vividly brings to life the profound human implications of the Age of Genetics while illuminating one of today's most controversial topics: the connection between genetics and who we are, and specifically the question "Who is a Jew?" Entine weaves a fascinating narrative, using breakthroughs in genetic genealogy to reconstruct the Jewish biblical tradition of the chosen people and the hereditary Israelite priestly caste of Cohanim. Synagogues in the mountains of India and China and Catholic churches with a Jewish identity in New Mexico and Colorado provide different patterns of connection within the tangled history of the Jewish diaspora. Legendary accounts of the Hebrew lineage of Ethiopian tribesmen, the building of Africa's Great Zimbabwe fortress, and even the so-called Lost Tribes are reexamined in light of advanced DNA technology. Entine also reveals the shared ancestry of Israelites and Christians. As people from across the world discover their Israelite roots, their riveting stories unveil exciting new approaches to defining one's identity. Not least, Entine addresses possible connections between DNA and Jewish intelligence and the controversial notion that Jews are a "race apart." ABRAHAM'S CHILDREN is a compelling reinterpretation of biblical history and a challenging and exciting illustration of the promise and power of genetic research.

All Abraham's Children is Armand L. Mauss's long-awaited magnum opus on the evolution of traditional Mormon beliefs and practices concerning minorities. He examines how members of the Church of Jesus Christ of Latter-day Saints have defined themselves and others in terms of racial lineages. Mauss describes a complex process of the broadening of these self-defined lineages during the last part of the twentieth century as the modern Mormon church continued its world-wide expansion through massive missionary work. Mauss contends that Mormon constructions of racial identity have not necessarily affected actual behavior negatively and that in some cases Mormons have shown greater tolerance than other groups in the American mainstream. Employing a broad intellectual historical analysis to identify shifts in LDS behavior over time, All Abraham's Children is an important commentary on current models of Mormon historiography.

In virtually every sport in which they are given opportunity to compete, people of African descent dominate. East Africans own every distance running record. Professional sports in the Americas are dominated by men and women of West African descent. Why have blacks come to dominate sports? Are they somehow physically better? And why are we so uncomfortable when we discuss this? Drawing on the latest scientific research, journalist Jon Entine makes an irrefutable case for black athletic superiority. We learn how scientists have used numerous, bogus "scientific" methods to prove that blacks were either more or less superior physically, and how racist scientists have often equated physical prowess with intellectual deficiency. Entine recalls the long, hard road to integration, both on the field and in society. And he shows why it isn't just being black that matters—it makes a huge difference as to where in Africa your ancestors are from. Equal parts sports, science and examination of why this topic is so sensitive, Taboo is a book that will spark national debate.

Reframing religious diversity through the stories of Cain, Ishmael, and Esau The way we read the Bible matters for the way we engage the pluralistic world around us. For instance, if we understand the book of Genesis as narrowly focused on primary characters like Abraham, Isaac, Jacob, and Joseph, we'll miss the larger story and end up with the impression that God only cares about those who are "chosen." In fact, the narratives of marginalized biblical characters reveal that God protects and provides for them also. What might this mean for Christians living in a world of religious difference today? In *Father Abraham's Many Children*, Tyler Mayfield reflects on the stories of three of the most significant "other brothers" in the Bible--namely, on God's continued engagement with Cain after he murders Abel, Ishmael's circumcision as a sign of God's covenant, and Esau's reconciliation with Jacob. From these stories, Mayfield draws out a more generous theology of religious diversity, so that Christians might be better equipped to authentically love their neighbors of multiple faith traditions--as God loves, and has always loved, all humanity.

At its core, racism is a powerful system that creates false hierarchies of human value; its warped logic extends beyond race, from the way we regard people of different ethnicities or skin colors to the way we treat people of different sexes, gender identities, and body types. Racism intersects with class and culture and geography and even changes the way we see and value ourselves. In *How to Be an Antiracist*, Kendi takes readers through a widening circle of antiracist ideas□from the most basic concepts to visionary possibilities□that will help readers see all forms of racism clearly, understand their poisonous consequences, and work to oppose them in our systems and in ourselves. Kendi weaves an electrifying combination of ethics, history, law, and science with his own personal story of awakening to antiracism. Americans have built an empire on the idea of "race," a falsehood that damages us all but falls most heavily on the bodies of black women and men—bodies exploited through slavery and segregation, and, today, threatened, locked up, and murdered out of all proportion. What is it like to inhabit a black body and find a way to live within it? And how can we all honestly reckon with this fraught history and free ourselves from its burden? *Between the World and Me* is Ta-Nehisi Coates's attempt to answer these questions in a letter to his adolescent son. Coates shares with his son—and readers—the story of his awakening to the truth about his place in the world through a series of revelatory experiences, from Howard University to Civil War battlefields, from the South Side of Chicago to Paris, from his childhood home to the living rooms of mothers whose children's lives were taken as American plunder. Beautifully woven from personal narrative, reimagined history, and fresh, emotionally charged reportage, *Between the World and Me* clearly illuminates the past, bravely confronts our present, and offers a transcendent vision for a way forward.

This book explores the relationship between race and class among middle-class Christians in South Africa. The book provides a theoretically sophisticated and empirically rich study of middle-class Christians in contemporary South Africa, as they seek to live good lives and build a good society. Focused on the city of Cape Town, drawing upon ethnographic research in conservative and progressive multiracial Protestant churches, furnished with critical analysis of South African literature and popular culture, this timely study explores expressions of ambition and anxiety that are both spiritual and material. Building upon debates over middle-class identity and morality from sociology, anthropology, and cultural studies, this book analyses congregational attempts at social unity through worship music and creative youth ministry, discussions on white privilege and shame, and the impact of middle-class black activism in South African churches and society. This book will be of interest to researchers of South African culture and society, religion, anthropology, and sociology.

An enlightening narrative exploring an oft-overlooked aspect of the sixteenth president's life, *An American Marriage* reveals the tragic story of Abraham Lincoln's marriage to Mary Todd. Abraham Lincoln was apparently one of those men who regarded "connubial bliss" as an untenable fantasy. During the Civil War, he pardoned a Union soldier who had deserted the army to return home to wed his sweetheart. As

the president signed a document sparing the soldier's life, Lincoln said: "I want to punish the young man—probably in less than a year he will wish I had withheld the pardon." Based on thirty years of research, *An American Marriage* describes and analyzes why Lincoln had good reason to regret his marriage to Mary Todd. This revealing narrative shows that, as First Lady, Mary Lincoln accepted bribes and kickbacks, sold permits and pardons, engaged in extortion, and peddled influence. The reader comes to learn that Lincoln wed Mary Todd because, in all likelihood, she seduced him and then insisted that he protect her honor. Perhaps surprisingly, the 5'2" Mrs. Lincoln often physically abused her 6'4" husband, as well as her children and servants; she humiliated her husband in public; she caused him, as president, to fear that she would disgrace him publicly. Unlike her husband, she was not profoundly opposed to slavery and hardly qualifies as the "ardent abolitionist" that some historians have portrayed. While she provided a useful stimulus to his ambition, she often "crushed his spirit," as his law partner put it. In the end, Lincoln may not have had as successful a presidency as he did—where he showed a preternatural ability to deal with difficult people—if he had not had so much practice at home.

This book revolutionises our understanding of race. Building upon the insight that races are products of culture rather than biology, Colin Kidd demonstrates that the Bible - the key text in Western culture - has left a vivid imprint on modern racial theories and prejudices. Fixing his attention on the changing relationship between race and theology in the Protestant Atlantic world between 1600 and 2000 Kidd shows that, while the Bible itself is colour-blind, its interpreters have imported racial significance into the scriptures. Kidd's study probes the theological anxieties which lurked behind the confident facade of white racial supremacy in the age of empire and race slavery, as well as the ways in which racist ideas left their mark upon new forms of religiosity. This is essential reading for anyone interested in the histories of race or religion.
