Can you just adjust the resolution down a little? 3840 x 2160 is extremely sharp on that size display IMO. I use that resolution, but at about 102 pix/inch or ~ 0.249mm pixel pitch, which is very close to a 22" at 1920 x 1080. ... Cyberpunk did lose some FPS though so I am definitely going to play something else for a while and give this some time to get fixed. The only way your HDR can be "fine" on driver 460.79 is if you use the wrong Black Level setting on your set for your Output Dynamic Range setting in the Nvidia CP.
