Mitosis/Cytokinesis provides a comprehensive discussion of the various aspects of mitosis and cytokinesis, as studied from different points of view by various authors. The book summarizes work at different levels of organization, including phenomenological, molecular, genetic, and structural levels. The book is divided into three sections that cover the premeiotic and premitotic events; mitotic mechanisms and approaches to the study of mitosis; and mechanisms of cytokinesis. The authors used a uniform style in presenting the concepts by including an overview of the field, a main theme, and a conclusion so that a broad range of biologists could understand the concepts. This volume also explores the potential developments in the study of mitosis and cytokinesis, providing a background and perspective into research on mitosis and cytokinesis that will be invaluable to scientists and advanced students in cell biology. The book is an excellent reference for students, lecturers, and research professionals in cell biology, molecular biology, developmental biology, genetics, biochemistry, and physiology.

The building blocks of all life[human and otherwise]are basic chemical molecules common to all organisms that simultaneously unite all species and set them apart. Together, nucleic acids, amino acids, proteins, lipids, and carbohydrates determine our genetic makeup, power our movements, and generally enable some of the most vital and complex chemical reactions of the body. This volume examines the structure and function of each of these fascinating elements and the interrelationships between them, which nurture all existence.

A helpful review guide for the 300,000 Texas high school freshmen who annually need to pass the exam in order to graduate Relevant to all Texas high school students needing to take the Algebra I end-of-course exam, this Quick Review includes practice problems and chapter-level reviews of topics comprising the State of Texas Assessments of Academic Readiness (STAAR) End-of-Course Algebra I exam. Applying the proven Quick Review methodology to the STAAR EOC Algebra I, each chapter targets one of the five Reporting Categories that comprise the exam: Functional Relationships Properties and Attributes of Functions Linear Functions Linear Equations and Inequalities Quadratics and Other Nonlinear Functions Two practice tests with answers and explanations to every test question round out this book.
