"South Africa possesses one of the richest popular music traditions in the world - from marabi to mbaqanga, from boeremusiek to bubblegum, from kwela to kwaito. Yet the risk that future generations of South Africans will not know their musical roots is very real. Of all the recordings made here since the 1930s, thousands have been lost for ever, for the powers-that-be never deemed them worthy of preservation. If one peruses the books that exist on South African popular music, one still finds that their authors have on occasion jumped to conclusions that were not as foregone as they had assumed. Yet the fault lies not with them, rather in the fact that there has been precious little documentation in South Africa of who played what, or who recorded what, with whom, and when. This is true of all music-making in this country, though it is most striking in the music of the black communities. Beyond memory: recording the history, moments and memories of South African music is an invaluable publication because it offers a first-hand account of the South African music scene of the past decades from the pen of Max Thamagana Mojapelo, who was situated in the very thick of things, thanks to his job as a DJ at the South African Broadcasting Corporation. This book -astonishing for the breadth of its coverage - is based on his diaries, on interviews he conducted and on numerous other sources, and we find in it not only the well-known names of recent South African music but a countless host of others whose contribution must be recorded if we and future generations are to gain an accurate picture of South African music history of the late 20th and early 21st centuries"--Publisher's description.

This book is the first that provides a comprehensive overview of the way countries, education systems and institutions have responded to the call for an integration of learning for work, citizenship and sustainability at the Second International Conference on Technical and Vocational Education which was held in Seoul in 1999. Discussions on the central theme of the Seoul Conference - lifelong learning and training for all, a bridge to the future – led to the conclusion that a new paradigm of both development and Technical and Vocational Education (TVET) was needed. This book showcases the wide range of international initiatives that have sought to put such exhortations into practice. It includes: case studies of national TVET policy reforms, reoriented curricula, sustainable campus management programs, and examples of innovative approaches to integrating learning in TVET with on-the-job training and in community service. It also focuses on the issues and challenges being faced and ways of moving forward. Case studies feature initiatives in a wide range of world regions and countries, and include authors from: UK, Germany, Finland, Canada, USA, Australia, South Africa, China, Republic of Korea, India, Pakistan and the Philippines.
