First published in 1865, “The Celebrated Jumping Frog of Calaveras County” was Mark Twain’s first real literary success and arguably launched his career as a writer. The story revolves around a tale the narrator once heard about a gambler named Jim Smiley who would bet on absolutely anything. An amusing tale of mistaken identity and a frog called Daniel Webster, “The Celebrated Jumping Frog of Calaveras County” is a must-read that will not disappoint fans of Twain’s unique work. Samuel Langhorne Clemens (1835–1910), more commonly known under the pen name Mark Twain, was an American writer, lecturer, publisher and entrepreneur most famous for his novels “The Adventures of Tom Sawyer” (1876) and “The Adventures of Huckleberry Finn” (1884). Other notable works by this author include: “The Gilded Age: A Tale of Today” (1873) and “The Prince and the Pauper” (1881). Read & Co. Classics is proudly republishing this classic short story now in a new edition complete with a specially-commissioned biography of the author.

Funny Bones tells the story of how the amusing calaveras—skeletons performing various everyday or festive activities—came to be. They are the creation of Mexican artist José Guadalupe (Lupe) Posada (1852–1913). In a country that was not known for freedom of speech, he first drew political cartoons, much to the amusement of the local population but not the politicians. He continued to draw cartoons throughout much of his life, but he is best known today for his calavera drawings. They have become synonymous with Mexico’s Día de los Muertos (Day of the Dead) festival. Juxtaposing his own art with that of Lupe’s, author Duncan Tonatiuh brings to light the remarkable life and work of a man whose art is beloved by many but whose name has remained in obscurity. The book includes an author’s note, bibliography, glossary, and index.

Deep in the backwoods of Calaveras County accidents happen. For gritty rancher and soon-to-be grandmother Kate Dunnigan, these deaths are mostly good old cowboy justice—until the day that justice hits home. Kate’s idyllic façade is destroyed when Emma Lee, her pregnant daughter, is wanted for murder. On the run and fighting to survive, Emma Lee is haunted by filthy family secrets, but Kate will stop at nothing to save her from life in prison, even if it means using herself as bait.

This three-volume encyclopedia describes and explains the variety and commonalities in Latina/o culture, providing comprehensive coverage of a variety of Latina/o cultural forms—popular culture, folk culture, rites of passages, and many other forms of shared expression.

All students can learn about language usage using a classic fiction passage written at four reading levels. Symbols on the pages represent reading-level ranges to help differentiate instruction. Provided comprehension questions complement the text.

California’s Calaveras County—made famous by Mark Twain and his celebrated Jumping Frog—is the focus of this comprehensive study of Mother Lode mining. Most histories of the California Mother Lode have focused on the mines around the American and Yuba Rivers. However, the “Southern Mines”—those centered around Calaveras County in the central Sierra—were also important in the development of California’s mineral wealth. Calaveras Gold offers a detailed and meticulously researched history of mining and its economic impact in this region from the first discoveries in the 1840s until the present. Mining in Calaveras County covered the full spectrum of technology from the earliest placer efforts through drift and hydraulic mining to advanced hard-rock industrial mining. Subsidiary industries such as agriculture, transportation, lumbering, and water supply, as well as a complex social and political structure, developed around the mines. The authors examine the roles of race, gender, and class in this frontier society; the generation and distribution of capital; and the impact of the mines on the development of political and cultural institutions. They also look at the impact of mining on the Native American population, the realities of day-to-day life in the mining camps, the development of agriculture and commerce, the occurrence of crime and violence, and the cosmopolitan nature of the population. Calaveras County mining continued well into the twentieth century, and the authors examine the ways that mining practices changed as the ores were depleted and how the communities evolved from mining camps into permanent towns with new economic foundations and directions. Mining is no longer the basis of Calaveras’s economy, but memories of the great days of the Mother Lode still attract tourists who bring a new form of wealth to the region.

Northern Calaveras County stretches eastward from the valley towns of Wallace and Jenny Lind, through the Campo Seco and Mokelumne Hill gold country, to the county seat in San Andreas and finally extends to the upcountry mining camps and logging settlements of West Point and Railroad Flat. Historically water and trails connected these diverse regions. The Mokelumne River and its tributaries—diverted into flumes and ditches—brought water to the river bars, mines, ranches, settlements, and towns and provided their lifeblood. Trails first followed Native American paths and then developed into stage roads, railroads, and state highways. These routes connected the valley to the mountains and carried pioneers seeking gold, water, timber, fertile land, and recreation to new lands and new lives.

Augustus T. Dowd could scarcely believe his eyes when he stumbled upon one of nature’s majestic wonders in 1852. Hunting down a wounded bear in the hills above the mining camp of Murphys, Dowd instead found a tree of mammoth proportions. After initial skepticism about the size of these trees, news of Dowd’s discovery quickly spread. Local businessmen soon acquired the grove of 100 mammoth trees, or giant sequoia, and built accommodations for travelers. Thus began one of California’s earliest tourist attractions in 1853. Dedicated as a California State Park in 1931, Calaveras Big Trees State Park hosts 250,000 annual visitors who come from around the world to marvel at these wondrous giants in their magnificent natural surroundings.
