The average sea level rise worldwide over 2016-2020 was nearly half a centimetre per year, says the United in Science 2020 report, published by the World Meteorological Organisation (WMO), Intergovernmental Panel on Climate Change (IPCC) and other scientific institutions. The rate of sea level rise is now significantly higher than the twentieth century average, largely due to the loss of ice from the great ice sheets on Antarctica and Greenland, besides warmer ocean waters expanding.

Capitalism and climate crisis in India

'Climate change we know is intrinsically linked to the model of economic growth in the world. Neo-liberal economists today accept that climate change is the market's biggest failure. But still the world is looking for small answers to tinker its way out of the problem of growth. It is time we looked for new ways of 'business unusual'.
