[Causal Inference in Sociological Research.pdf - SO36CH02 ...](#)

Causal inference is the process of drawing a conclusion about a causal connection based on the conditions of the occurrence of an effect. The main difference between causal inference and inference of association is that the former analyzes the response of the effect variable when the cause is changed. The science of why things occur is called etiology. Causal inference is an example of causal reasoning.

[Causal inference - Wikipedia](#)

Methods associated with three major strategies of small-N causal inference are examined: nominal comparison, ordinal comparison, and within-case analysis. The article argues that the use of these three strategies within particular small -N studies has led scholars to reach radically divergent conclusions about the logic of causal analysis in small -N research.

[Strategies of Causal Inference in Small-N Analysis - JAMES ...](#)

Examines causal inference from a counterfactual perspective. Offers techniques for the estimation of causal effects. Provides examples from the social, demographic, and health sciences. The second edition has been thoroughly revised and enlarged, and is 163% of the first edition by length. Read more.

[Counterfactuals and Causal Inference | Sociology: general ...](#)

Construct a causal DAG that reflects assumptions about how factors relate to one-another, including confounding and selection bias. Explain the difference between standardization and stratification for managing confounding and bias. Use an appropriate theory and conceptual framework to build a DAG for a testable hypothesis about health outcomes.
