Capital budgeting is the process of analyzing investment opportunities and deciding which ones to accept. A capital budget is a list of all projects that a company plans to undertake during the next period. We use the NPV rule to evaluate capital budgeting decisions, making decisions that maximize NPV. When deciding to accept or reject a project, we accept projects with a positive NPV.

the “Great Recession” and to enhance economic recovery. In the US, this includes the actions of the Federal Reserve as well as legislative efforts, such as the American Recovery and Reinvestment Act. • Significant increase in use of fiscal policy tools to stimulate economic recovery, in contrast to most recent previous 20 year period. • The federal government’s direct role in the operations of the private sector will be explored. The government has become a major stockholder and therefore has a financial stake in seeing that corporations succeed. • Unprecedented federal deficits, as well as

the following classical theoretical areas of corporate finance: (1) Pre-M&M Theory, (2) M&M Theory, (3) CAPM, and (4) Option Pricing Theory (OPT). The interrelationships among these theories are carefully analyzed. Real world examples are used to enrich the learning experience; and alternative planning and forecasting models are used to show how the interdisciplinary approach can be used to make meaningful financial-management decisions. In this third edition, we have extensively updated and expanded the topics of financial analysis, planning and forecasting. New chapters were added, and
