The intended use of a test can be diagnosis, screening, staging, monitoring, surveillance, prognosis, treatment selection or other purposes.¹⁸ The clinical role of the test under evaluation refers to its anticipated position relative to other tests in the clinical pathway.¹⁹ A triage test, for example, will be used before an existing test ...

STARD 2015 guidelines for reporting diagnostic accuracy ...

Cancer staging is the process of determining the extent to which a cancer has developed by growing and spreading. Contemporary practice is to assign a number from I to IV to a cancer, with I being an isolated cancer and IV being a cancer that has spread to the limit of what the assessment measures.
