Chronic Disease Epidemiology and Control, Fourth Edition provides an overview of current knowledge and best practices in the prevention and control of major chronic diseases and their risk factors. Chapter authors highlight many public health successes in which evidence-based interventions have resulted in improved health and the reduction or elimination of disparities.

Chronic Disease Epidemiology, Prevention, and Control ...

The mission of the Chronic Disease Epidemiology Department (CDE) is to advance the health of the public by promoting a research-based approach to the prevention and management of chronic disease, and to educate future leaders of the field. The department aims to enhance understanding about the determinants of chronic diseases in populations and how to intervene most effectively to reduce morbidity and mortality due to chronic diseases.

Chronic Disease Epidemiology < Research & Practice

Chronic Disease Epidemiology Research in the chronic disease epidemiology unit addresses the etiology, prevention, distribution, natural history, and treatment outcomes of chronic health disorders, including cancer (particularly breast, colon, lung, prostate, ovary and pancreas), cardiovascular disease, diabetes, gastrointestinal and pulmonary disease, and obesity.

Chronic Disease Epidemiology | Columbia Public Health

Measuring how many Americans have chronic diseases or chronic disease risk factors. CDC uses dozens of surveillance systems to collect data on chronic diseases and their risk factors. These systems—often the only source of such data—help epidemiologists understand how chronic diseases affect Americans. Surveillance and epidemiology guide us in putting our resources to the best use.

The objectives of Integrated Chronic Disease Prevention and Control Programme are: to strengthen prevention and control of chronic noncommunicable diseases by tackling the major risk factors, focusing on WHO's four priority noncommunicable diseases - cardiovascular diseases, cancer, diabetes, and chronic respiratory diseases, and underlying determinants of health:

WHO | Integrated chronic disease prevention and control

One possible barrier to improving epidemiologic capacity in chronic disease prevention and health promotion programs is that chronic disease program managers and public health decision makers may have a limited understanding of basic chronic disease epidemiology functions. We describe the assessment process of data collection, analysis, interpretation, and dissemination, and, using examples ...
