BACKGROUND IN 1996, THE NAVAL SPECIAL WARFARE COMMAND DEVELOPED A NEW SET OF TACTICALLY APPROPRIATE BATTLEFIELD TRAUMA CARE GUIDELINES NAMED TCCC. THE TCCC GUIDELINES WERE ADOPTED BY THE U.S. SPECIAL OPERATIONS COMMAND (USSOCOM) AND APPROVED BY THE AMERICAN COLLEGE OF SURGEONS (ACS) AND THE NATIONAL ASSOCIATION OF EMERGENCY MEDICAL TECHNICIANS. THE COMMITTEE ON TCCC WAS ESTABLISHED IN 2001 AND WAS DIRECTED TO FURTHER DEVELOP THE TCCC STANDARDS AND GUIDELINES. THE COMMITTEE ON TCCC FUNCTIONS AS A WORKING GROUP OF THE TRAUMA AND INJURY SUBCOMMITTEE OF THE DEFENSE HEALTH BOARD (DHB), WHICH HAS A CHARTER TO PROVIDE MEDICAL RECOMMENDATIONS TO ASD (HA) AND THE SERVICE SURGEONS GENERAL. TCCC CONCEPTS WERE INCORPORATED INTO THE 8404 CORPSMAN TRAINING CURRICULUM IN 2005. THE TCCC/CLS TRAINER COURSE WAS DEVELOPED IN 2006 TO PROVIDE CORPSMEN AS TRAINERS TO TEACH AND SUSTAIN TCCC STANDARDS TO CORPSMEN AND CLS SKILLS TO SELECTED MARINES WITHIN THE OPERATING FORCES. THE IMPLEMENTATION OF TCCC ACROSS ALL SERVICES HAS BEEN IDENTIFIED AS ONE OF THE CONTRIBUTING FACTORS TO THE HIGHEST COMBAT CASUALTY SURVIVAL RATES IN HISTORY AND IS RECOMMENDED BY ASD (HA) FOR USE WHEN TRAINING COMBAT MEDICAL PERSONNEL, REF B. TCCC INFORMATION IS PUBLISHED IN THE PREHOSPITAL TRAUMA LIFE SUPPORT MANUAL (PHTLS), MILITARY EDITION, WHICH IS UPDATED

EVERY FOUR YEARS. DEPARTMENT OF DEFENSE (DOD) APPROVED TCCC TRAINING CURRICULA ARE UPDATED ON THE DOD WEBSITE MHS.OSD.MIL/EDUCATION AND TRAINING/TCCC.ASPX AS THE TCCC GUIDELINES CHANGE. GOAL. ELIMINATE PREVENTABLE LOSS OF LIFE ON THE BATTLEFIELD. IN ACCOMPLISHING THIS GOAL, THE MOST RECENT TCCC GUIDELINES APPROVED BY DOD ARE TO BE UTILIZED AS A MEANS OF PROVIDING STANDARDIZED TRAINING TO THE MARINE CORPS AND IMPROVING FIRST RESPONDER CARE AT THE POINT OF INJURY. HISTORY OF TCCC: a. It is important to realize that civilian trauma care in a non-tactical setting is dissimilar to trauma care in a combat environment. TCCC and CLS are an attempt to better prepare medical and non-medical personnel for the unique factors associated with combat trauma casualties. b. Historical data shows that 90% of combat wound fatalities die on the battlefield before reaching a military treatment facility. This fact illustrates the importance of first responder care at the point of injury. c. TCCC was originally a US Special Operations research project which was composed of trauma management guidelines focusing on casualty care at the point of injury. d. TCCC guidelines are currently used throughout the US Military and various allied countries. e. TCCC guidelines were first introduced in 1996 for use by Special Operations corpsmen, medics, and pararescue (PJs). f. The TCCC guidelines are currently endorsed by the American College of Surgeons, Committee on Trauma and the National Association of Emergency Medical Technicians. The guidelines have been incorporated into the Prehospital Trauma Life Support (PHTLS) text since the 4th edition. EVACUATION STUDENT HANDOUT COMBAT LIFESAVER / TACTICAL COMBAT CASUALTY CARE STUDENT HANDOUT Combat Lifesaver / Tactical Combat Casualty Care Instructor Course Student Handbook Command Philosophy My philosophy is basic—provide the highest quality service possible to every person you encounter. We are an institution of higher learning; we need to be the best with everything we do. We are preparing the next generation of heroes for the greatest fighting force on the planet - the 8404 Hospital Corpsman assigned to the United States Marine Corps. They operate at the tip-of-the spear providing combat medicine to our operational forces; they are critical to the success of the Navy & Marine Corps Medicine Team. What each one of us does on a daily basis matters, regardless of our job. We all contribute to the mission. No one job is more important than the other. If just one link (team member) in this chain fails to perform a portion of the mission to standard, we all fail. You have the ability to make a positive difference in peoples' lives every day. Every member of this team should ask themselves, "Am I living by our core values and making decisions that are consistent with these values when I interact with students, staff and the American public." Key points: - Know your chain of command and how to use it. You have not exhausted your chain of command at FMTB-West until the issue reaches me. - If you are lacking something to perform your mission, bring it to the attention of leadership so we can promptly address it. - Any safety issue should immediately be brought to leadership. - Continually strive to improve processes; ask for help before it's too late (in all aspects of your life and career). - If you see a problem, fix it or bring it to the attention of someone who can. Don't ignore it. - Supporting each other is just as important as supporting the mission. - Continue the relentless pursuit of customer satisfaction; feedback is a valuable tool in life and career. - Basic military courtesy should be a part of everyday life. - Always strive to do the right thing, even when no one is looking or when tempted to take the "easy" wrong. As a leader, I believe all

Read Book Combat Lifesaver Course Instructor Guide

members of the team are important. Our civilian shipmates are essential to the success of our mission. As a military leader, I believe, as the Sailor creed says, "I proudly serve my country's Navy combat team with Honor, Courage and Commitment. I am committed to excellence and the fair treatment of all". I cannot over emphasize the importance of leadership from E-1 to O-6, everyone has a part; I expect officers to lead from the front by setting the example. Be sure that regularly scheduled performance counseling sessions are conducted for military and civilian employees. Cover the good which should be sustained as well as the areas which need improvement. Although I like to be informed, I believe in allowing leaders to lead, managers to manage. A big part of my job is to provide you the support systems necessary for you to accomplish your mission. Tell me what you need and don't worry how it will be resourced. Let me worry about that.

This is a complete reproduction of the revised Edition C of the Army's Combat Lifesaver course. The course contains information needed to pass the written, written performance, and performance examinations for combat lifesaver certification and recertification. All of the tasks contain important, lifesaving information. Terminal objectives are: Tactically manage a casualty. Given a casualty in a battlefield environment and a combat lifesaver medical equipment set. Applied the procedures given in this course so that the mission is not endangered and the risk of additional injury to the casualty is minimized. Evaluate and treat a casualty. Given a combat lifesaver medical equipment set and a casualty with one or more of the following problems: blocked airway, no respiration, bleeding from an extremity, amputation of an extremity, hypovolemic shock, or open chest wound. Performed needed procedures in accordance with the procedures given in this course and documented the treatment on a U.S. Field Medical Card or Tactical Combat Casualty Care Card, as appropriate. Prepare and transmit a request for

Read Book Combat Lifesaver Course Instructor Guide

medical evacuation. Given a writing instrument, a MEDEVAC worksheet, needed information, and a transmitting device. Prepared a MEDEVAC request in correct format and transmitted the request following the rules for proper transmission. Transport a casualty. Given a casualty in need of evacuation, drag equipment (such as a Dragon Harness or SLICK litter), a SKED litter, a Talon litter, materials for improvising a litter (if used), and assistant(s) (if needed). Prepared the SKED litter, Talon litter, improvised litter, or other equipment (if used) and evacuated the casualty using a drag, manual carry, or litter in accordance with the procedures given in this subcourse. **Combat Lifesaver * Lesson 1 - INTRODUCTION TO THE COMBAT LIFESAVER AND TACTICAL COMBAT CASUALTY CARE * Lesson 2 - CARE UNDER FIRE * Lesson 3 - TACTICAL FIELD CARE * Lesson 4 - CONTROLLING BLEEDING * Lesson 5 - OPENING AND MANAGING A CASUALTY'S AIRWAY * Lesson 6 - TREATING PENETRATING CHEST TRAUMA * Lesson 7 - INITIATING A FIELD MEDICAL CARD OR TCCC CARD * Lesson 8 - REQUESTING MEDICAL EVACUATION * Lesson 9 - TACTICAL CASUALTY MOVEMENT * Lesson 10 - EVACUATING A CASUALTY USING A LITTER * Appendix A - COMBAT LIFESAVER MEDICAL EQUIPMENT SET * Appendix B - HAWES CARRY**

Tactical Combat Casualty Care (TCCC) has saved hundreds of lives during our nation's conflicts in Iraq and Afghanistan. Nearly 90 percent of combat fatalities occur before a casualty reaches a medical treatment facility. Therefore, the prehospital phase of care is needed to focus on reducing the number of combat deaths. However, few military physicians have had training in this area and, at the onset of hostilities, most combat medics, corpsmen, and pararescue personnel in the U.S. military have been trained to perform battlefield trauma care through civilian-based trauma courses. These courses are not

Read Book Combat Lifesaver Course Instructor Guide

designed for the prehospital combat environment and do not reflect current practices in the area of prehospital care. TCCC was created to train Soldiers and medical personnel on current best practices for medical treatment from the point of injury to evacuation to Role 3 facilities

The Prepper Med Basic Course Manual is intended to function both as the course book for the Prepper Med Basic Course offered by Prepper Med Training of Conover, NC, or as a standalone reference manual for the user. While we have sought to include as much information as possible for completing the tasks taught in the manual, it is highly recommended that the user attend a Prepper Med Basic Course, or its equivalent, in person.

Army Regulation 350-1 is the keystone training regulation for all US Army units. This regulation is the source reference for all training conducted within units across the US Army. This continent 6x9 paperback is designed with commanders, executive officers, and company grade NCOs in mind for portability and ease of use.
