The financial statements presented in a financial report shows you where the company earned the money and how they used the money they earned. For example, a balance sheet shows a record of the properties they own, the debts they have, and the net amount of money they earned from day-to-day operations.

In terms of financial statements, all companies are required to prepare their own separate financial statements. However there is an additional requirement for parent companies to prepare Consolidated Financial Statements of the entire group as well. In consolidated financial statements all assets, liabilities, income and expenditure of all companies within the group are consolidated after eliminating transactions performed with each other.

What is the difference between a group and a company when ...

Of particular importance is the availability of cash within a group of companies, the ability to transfer such resources around the group to where it is needed, given operational, regulatory and legal constraints, and the access to further cash through existing and potential financing facilities. ... The Financial Reporting Council Limited is a ...

About the FRC I COVID - Financial Reporting Council

Definition: Financial reporting refers to the communication of financial information, like financial statements, to the financial statement users, like investors and creditors. Financial reporting is typically viewed as companies issuing financial statements. A general purpose set of financial statements include a balance sheet, income statement, statement of owner's equity, and statement of cash flows, but financial reporting is much more broad than just as set of financial statements.

What is Financial Reporting? - Definition | Meaning | Example
