Approach — Computer Networks ... Suppose you want to build a computer network, one that has the potential to grow to global proportions and to support applications as diverse as teleconferencing, video on demand, electronic commerce, distributed

computing, and digital libraries.

Computer Networks: A Systems Approach - Open Textbook Library

Their systems-oriented approach encourages you to think about how individual network components fit

into a larger, complex system of interactions. Whatever your perspective, whether it be that of an application developer, network administrator, or a designer of network equipment or protocols, you will come away with a 'big picture' understanding of how

modern networks and their applications are built.

An internetwork is often referred to as a "network of networks" because it is made up of lots of smaller networks. In this figure, we see Ethernets, a wireless network, and a point-to-point link. Each of these is a single-

technology network. The nodes that interconnect the networks are called routers.
