Contemporary Class Piano continues to receive accolades for its excellence in offering a creative, diverse approach to beginning piano. Colleges and universities throughout the country have found success with Elyse Mach's carefully constructed, step-by-step approach.

Bridging the fields of conservation, art history, and museum curating, this volume contains the principal papers from an international symposium titled "Historical Painting Techniques, Materials, and Studio Practice" at the University of Leiden in Amsterdam, Netherlands, from June 26 to 29, 1995. The symposium—designed for art historians, conservators, conservation scientists, and museum curators worldwide—was organized by the Department of Art History at the University of Leiden and the Art History Department of the Central Research Laboratory for Objects of Art and Science in Amsterdam. Twenty-five contributors representing museums and conservation institutions throughout the world provide recent research on historical painting techniques, including wall painting and polychrome sculpture. Topics cover the latest art historical research and scientific analyses of original techniques and materials, as well as historical sources, such as medieval treatises and descriptions of painting techniques in historical literature. Chapters include the painting methods of Rembrandt and Vermeer, Dutch 17th-century landscape painting, wall paintings in English churches, Chinese paintings on paper and canvas, and Tibetan thangkas. Color plates and black-and-white photographs illustrate works from the Middle Ages to the 20th century.

Sheryl Iott investigates the relevancy of cognitive science to musical development and distills cutting-edge teaching and learning methods for musicians of all skill levels based on these scientific concepts. Filled with over 100 musical examples, this book imparts practical suggestions and advice that anybody can incorporate into their practice.
