Welcome to Math 101! This
course is an introduction to
the study of Calculus, an
essential set of tools for
people in many disciplines.

Calculus is relatively young for a mathematical discipline (about 300 years!). It helps to answer questions about things that are changing, such as the position of an orbiting planet or the price of a

stock.

Math 101 - Calculus 1 -
Rebecca Tramel
MATH 101 - Calculus I This
is a first course in
calculus intended primarily
for science, mathematics or

computer science majors.
Topics include functions and
graphs, conic sections,
limits and continuity,
derivatives, techniques and
applications of
differentiation,
trigonometric functions,

logarithms and exponentials, extrema, the mean value theorem and polar coordinates.

Calculus I | Outlier.org

All math majors must complete the calculus sequence, Math 20100, 20200 and 20300. These courses cover the fundamentals of single variable and multivariable calculus. Although some advanced math

courses do not use any
calculus, the calculus
courses cover many methods
in algebra and geometry that
are essential in much of
higher mathematics.
