Steps to create a Config UI for the MDF objects are as below: Choose a MDF object (Base Object) for which you want to create a Config UI. Go To Admin Tools --> Employee Files --> Manage Configuration UI as seen in below screenshot.

2241616 -How to Configure a UI for a Generic Object in | SAP Help Portal

The MDF is a UI-based configuration and extension framework that provides creation, modification, maintenance, and deletion of custom objects (called Metadata Objects) within the SuccessFactors HCM suite. It replaces XML-based configuration and the need to import Master Data via CSV/Excel files. It is also leveraged by the SAP HANA Cloud Platform. At its core the MDF provides one generic set of the components that are re-used by all objects.

Extending SuccessFactors with the Metadata Framework - SAPSPOT

SuccessFactors internal application teams (such as Position Management, Time Off, JDM 2.0) use MDF to build their applications end-to-end. With MDF, you can create and manage database object definitions, object relationships, and object hierarchy. MDF is tightly integrated with workflow, rules engine, and reporting.

What is the Metadata Framework? - SAP Help Portal

The SuccessFactors Metadata Framework is Web-based software that gives SuccessFactors users the ability to create and maintain custom objects, screens and business rules to extend the platform 's functionality. This capability is primarily available for SuccessFactors Employee Central but is also partially available for Compensation and Succession. SuccessFactors is a cloud-based human resources information system (HRIS) system.
