Throwing light on the mysterious phenomenon of crop circles within the context of modern psychological reality, Crop Circles, Jung, and the Reemergence of the Archetypal Feminine in an engaging look at the science, history, and symbolic nature of the mystery of these annually occurring giant-scale works of art. Gary S. Bobroff offers a framework for the reader's own deeper consideration of crop circles by examining both the phenomenon itself and the nature of the era into which it has arrived, with special consideration of its relevance to Jungian archetypal psychology. Living in the moment of the death of one worldview and the birth of another, our culture suffers from a hyper-masculine inflation that has us alienated, imagining ourselves to be separate from each other and the earth. Today we are presented with environmental, social, and spiritual crises and mysteries that call us back toward closer participation with the world. Crop Circles--formed in living grain--exemplify the archetypal feminine nature of this moment's change: a calling toward conscious, felt

A scientific investigation of the healing and energetic effects of crop circles • Shares the results of decades of research into crop circles, including detailed scientific explanations and responses from an 800-person questionnaire study • Explores the connections between crop circle formations, cosmic energies, and consciousness • Features stunning, full-color aerial photographs of crop circles from Lucy Pringle ' s personal collection In 1990 while studying the energetics of a crop circle, Lucy Pringle experienced a miraculous healing of a severe shoulder injury. Inspired, she expanded her research to investigate the physical, psychological, and energetic effects of these mysterious formations on people as well as on animals. In this book, alongside her stunning full-color aerial photographs of crop circles, Pringle shares the results of her research, including anecdotes from an 800-person questionnaire study, in combination with detailed scientific explanations by aerospace engineer and fellow crop circle researcher James Lyons. The authors discuss case histories of healing, from temporary respite from arthritis, Reynaud ' s, and Parkinson ' s, to the permanent cure of muscle strains and chronic pain, to emotional healing and feelings of peace and happiness. They explore the relationship of crop circle formations and consciousness, highlighting " intention " as a key factor in crop circle manifestation. Pringle describes the wide range of physiological effects--both positive and negative--caused by the frequencies in crop circles and shows how the negative symptoms may possibly be caused by heavy use of pesticides. Drawing on the science behind the formation of the Aurora Borealis, or Northern Lights, the authors explain how the same electromagnetic waves that produce these lights in the sky also interact with the Earth ' s magnetic field and ley lines to produce geometric-energetic patterns in fields--crop circles--akin to the cymatic patterns of sand on a vibrating drum surface. They reveal dowsing as a way to identify underlying sacred geometry within a field and explain how healing arises as the result of communication with the self-organizing energy field of a crop circle. With the first recorded appearance of a crop circle formation more than 4,000 years ago, crop circles are an ancient part of Earth ' s and humanity ' s intertwined history that we are only beginning to understand.

We tie the weaknesses of our knowledge with the tight knots of our truths. The idea of a psyche within and the world outside us is so evident and true that, from a tight knot, it became part of the fabric of our knowledge. Put in other words, our belief in separation and independence of psyche and matter is so natural and immediate that resists situations that challenge its veracity. These situations, in turn, held on to us and became new knots that are now part of our fabric of knowledge. We must face our fear of not knowing, loosening such knots in order to enrich with new motifs the composition of this fabric, which insists in opening up and expanding. The phenomenon of synchronicity and the discoveries of quantum physics compel us to re-evaluate our scientific truths based on deterministic parameters.

Synchronicity, as described by Jung, is a connection between a psychic, subjective event, and an external physical event, according to its meaning and not due to cause and effect. Inserted into an acausal order, it raises questions on the relationship between psyche and matter. The findings of quantum physics also demand from us new ways of seeing reality. The psyche of the observer has proven crucial, affecting the results of experimentation with matter, pointing out once again the interaction of psyche and matter. How can we ignore these findings? We can say that physics has explored the objectivity of matter leading to the psychic, while depth psychology moved towards subjectivity and found objective patterns of the psyche, the archetypes that make up the collective unconscious.

Throughout the world, mysterious patterns have almost magically started appearing in fields--baffling the farmers who own the land and the scientists who examine them. What are these fantastic geometric figures? Who (or what) is creating them? Two journalists specializing in crop circle research provide revealing answers in this bestselling and visually stunning study. A spectacular 30-page pictorial, which presents an eye-catching survey of the continuing phenomenon, will fascinate believers and non-believers alike with its surprising beauty, variety, and complexity.

Carl Jung was the founder of analytical psychology who revolutionized the way we approached the human psyche. Drawing on Eastern mysticism, mythology and dream analysis to develop his theories, Jung proposed many ideas which are still influential today, including introversion, extroversion and the collective unconscious. Knowledge in a Nutshell: Carl Jung introduces psychologist Jung's ideas in an engaging and easy-to-understand format. Jungian psychology expert Gary Bobroff breaks down the concepts of the psyche, collective unconscious, archetypes, personality types and more in this concise book. He also explores the influence on Eastern philosophy and religion on Jung's ideas, and how spiritualism enriched his theories. With useful diagrams and bullet-point summaries at the end of each chapter, this book provides an essential introduction to this influential figure and explains the relevance of Jung's ideas to the modern world. ABOUT THE SERIES: The 'Knowledge in a Nutshell' series by Arcturus Publishing provides engaging introductions to many fields of knowledge, including philosophy, psychology and physics, and the ways in which human kind has sought to make sense of our world.

The title for this book comes from the ancient Aboriginal concept of “ song lines ” —pathways to another world reached through dreamtime and visionary insight, and encounters with the unknown realm of experience. Veronica Goodchild addresses how dreams, synchronicities, UFO/ET encounters, Crop Circle mysteries, and NDEs all point to the new unfolding vision of reality. She draws on ancient mystery traditions to explore how this metamorphosis is already reflected cross-culturally in Hopi, Aztec, Mayan, Hindu, Tibetan, Maori, Zulu, Dogon, and Egyptian cultures. Songlines of the Soul proposes a new paradigm of reality, a new worldview. The signatures of this new reality are arising both in our own experiences and all around us if only we can stretch wide our stubbornly held perceptions of what is “ reality. ” As we stand at a crucial turning point in our human history, this book offers hope, a call to awaken and expand our perceptions of the fundamental principles that orchestrate reality. In an age when the answers offered by governments and traditional religion are no longer sufficient, the quest for meaning must—as it always has in the past—arise first through visions, dreams, and journeys to other dimensions of consciousness.

Each summer all over the world, gigantic and magnificent works of art are sculpted in fields of wheat, barley and other crops. Usually formed under the veil of darkness, in the few short hours between sunset and sunrise, they become visible as the mists of early morning evaporate under the rays of the sun. But are they elaborate hoaxes or eterna...

It is from the paranormal's multifaceted nature that the title of this book takes its meaning. Throughout its pages we encounter, time and again, talk of a wide variety of dimensions, levels and layers, from social, cultural, psychological and physiological dimensions, to spiritual, mythic, narrative, symbolic and experiential dimensions, and onwards to other worlds, planes of existence and realms of consciousness. The paranormal is, by its very nature, multidimensional. "Once again, Jack Hunter takes us down the proverbial rabbit hole, here with the grace, nuance and sheer intelligence of a gifted team of essayists, each working in her or his own way toward new theories of history, consciousness, spirit, the imagination, the parapsychological, and the psychedelic. Another clear sign that there is high hope in high strangeness, and that we are entering a new era of thinking about religion, about mind, about us." -- Jeffrey J. Kripal, author of *Authors of the Impossible: The Paranormal and the Sacred*.
