The Death of Reading? - NYU Scholars
Reading plays an essential role in our society but sadly "readings' role has diminished and likely will continue to shrink" (Stephens 149). But I believe that we shouldn't just let it happen, like Mitchell Stephens says, "it would not hurt any of us to read more to our children or take a book with us next time we must sit and wait" (Stephens 149).

Death Of Reading Mitchell Stephens Nyu
No, the death of reading was the article's gist. Teachers and parents and critics all share it: That like Monty Python's proverbial parrot. Reading is dead, deceased, pushing up daisies. People are growing increasingly lazy, lured by the siren of electronic toys. That fill up their lives with meaningless noise.

Mitchell Stephens (academic) - Wikipedia
One of the earliest articles I found that discusses the decline of reading is The Death of Reading by Mitchell Stephens written in 1991. Stephens is a journalism professor at the New York University. He paints a picture for us of day to day activities that have been altered by electronics. "Three people sit in a doctor 's waiting room.

Under the banner of family values, a war of more than words is being waged. At stake is the control of contemporary national culture-and the consciousness of succeeding generations. Michael J. Shapiro enters the fray with this galvanizing book, which exposes the assumptions, misconceptions, and historical inaccuracies that mark the neoconservative campaign to redeem an imagined past and colonize the present and future with a moral and political commitment to the "traditional family." Challenging the neoconservative assumption of a natural relation between a historically constant, traditional family structure and civic life, Shapiro shows how the situation of the family in relation to public life has emerged differently in different historical periods. For Moral Ambiguity juxtaposes moralizing versus historically sensitive, critical treatments of familial and public attachments, revealing how "the family"-as represented in historical and contemporary fiction, cinema, television, and other genres and media-emerges as a contingent cultural and historical structure. Shapiro treats the ways in which family space, however changeable, serves as a critical locus of "enunciation"-as a space from which diverse family personae challenge the relationships and historical narratives that support dominant structures of power and authority and offer ways to renegotiate the problem of "the political." By extending recognition to less heeded voices and genres of expression, he seeks to frame the political within a democratic ethos. Ultimately, the book compels us to understand "the political" as the continuous negotiation of different modes of civic presence.

Written as a Festschrift honouring a beloved professor, colleague, and friend, this volume comprises a collection of essays offering a wide array of contemporary approaches to literature, linguistics, and applied linguistics. It covers a variety of topics, ranging from medieval to contemporary literature and language, and explores genres as diverse as fantasy, dystopia, drama, poetry, and film, addressing issues such as post- and transhumanism, age, gender, identity, family, metonymy, and narrative discourse. The diversity of themes and methodologies here makes the collection a widely applicable resource in the academic discussion of literature, language, and culture, both as a significant contribution to different philological fields and a useful educational tool for anyone teaching or studying English, Anglophone literature, British, American, and German studies, English as a Second Language, linguistics, cognitive linguistics, and applied linguistics, or conducting research in these fields.

Post-structuralism is recognised as a major force within literary and cultural studies. This book is the first to apply the theory to politics and to show the ways in which it can illuminate political theory and analysis. As such it is likely to become a key text in the development of this area, providing a stimulating introduction to the subject. Authors explore the two-way relationship, showing not only that post-structuralism can enhance the study of politics, but also that advocates of post-structuralism can benefit from being open to the lessons political studies can teach. The book aims to* Clarify the relationship of contemporary theory to politics* Open up a new intellectual interface* Create a space for exchange between disciplines* Provide a statement of the role of post-structuralist theory in politicsCovering three main sections - What is Post-structuralist Political Theory? Post-structuralism and Political Analysis; and The Question of the Political - the authors draw on themes raised by Continental thinkers such as Derrida, Nancy and Deleuze, and Anglo-American thinkers such as Butler and Connolly in their questioning of the theoretical and empirical understanding of contemporary politics.Key Features:* First systematic examination of post-structuralism to see what it may mean for political studies* Advances its own rigorous and theoretically informed position* Cutting edge: provides a vibrant introduction to this area of political thought and analysis* Brings clarity to the two-way relationship between post-structuralism and politics

For a century and a half, journalists made a good business out of selling the latest news or selling ads next to that news. Now that news pours out of the Internet and our mobile devices-fast, abundant, and mostly free-that era is ending. Our best journalists, Mitchell Stephens argues, instead must offer original, challenging perspectives-not just slightly more thorough accounts of widely reported events. His book proposes a new standard: "wisdom journalism," an amalgam of the more rarified forms of reporting-exclusive, enterprising, investigative-and informed, insightful, interpretive, explanatory, even opinionated takes on current events. This book features an original, sometimes critical examination of contemporary journalism, both on- and offline. And it finds inspiration for a more ambitious and effective understanding of journalism in examples from twenty-first-century articles and blogs, as well as in a selection of outstanding twentieth-century journalism and Benjamin Franklin's eighteenth-century writings. Most attempts to deal with journalism's current crisis emphasize technology. This book emphasizes mindsets and the need to rethink what journalism has been and might become.

In The Sweet Hereafter, Russell Banks tells a story that begins with a school bus accident. Using four different narrators, Banks creates a small-town morality play that addresses one of life's most agonizing questions: when the worst thing happens, who do you blame?

First there was the spoken word, the long-distance runner, and later the wall posters of ancient Rome and China. Here is an investigation of the human need to gather and spread news, proving that the hunger for news and sensationalism wasn't born with modern technology.

Emphasizing critical thinking, College Reading and Study Skills approaches reading and study skills as active learning processes. Chapter on Reading Electronic Sources demonstrates the why and how of reading Web materials and electronic learning aids. Learning experiments help readers gain a better understanding of the principle presented in each chapter. Thematic readings create a framework so readers can practice critical thinking skills and make connections. Readings are drawn from a variety of sources, including newspapers, journal articles and Web pages. Visual aids, diagrams, tables, charts, etc. found throughout the book help visual learners process important information. Important study skills such as setting goals, understanding learning style and taking notes are covered in-depth in their own chapters. For those interested in developing their reading and study skills.

Surveys the development of journalism, looks at how news has been gathered and disseminated, and describes the ways journalists have described particular news stories
