findings for educational practice. There is extensive use of aides to facilitate student learning, including chapter objectives, roadmaps and concept maps, study questions, consumer tips, over 150 examples from published articles (also includes full length articles), and author reflections. The Sixth Edition includes a more extensive presentation of experimental and quasi-experimental design, consistent with the current emphasis on conducting "scientific research," qualitative data analysis, effect size, and two new chapters devoted to mixed-method studies and action research.

Revised edition of: Educational research. 6th ed. A2012.

Fundamentals of Educational Research succeeds in cutting through the complexities of research to give the novice reader a sound basis to define, develop, and conduct study, while providing insights for even the accomplished reader. This best-selling book is of value to all social researchers, but in particular to upper-level undergraduate and graduate students as well as researchers employed in private industry, management and government agencies. Anderson discusses the research process and offers a wealth of information on how to define a research problem, plan a study, develop a research framework, collect the data, analyse it and write it into a credible paper or thesis. He has

captured the essential components of the research process in a book that balances the quantitative and qualitative perspectives through both the academic and consulting research traditions.

This text provides a solid introduction to the foundations of research methods, with the goal of enabling students and professionals in the various fields of education to not simply become casual consumers of research who passively read bits and pieces of research articles, but discerning consumers able to effectively use published research for practical purposes in educational settings. All issues important for understanding and using published research for these purposes are covered. Key principles are illustrated with research studies published in refereed journals across a wide spectrum of education. Exercises distributed throughout the text encourage readers to engage interactively with what they are reading at the point when the information is fresh in their minds. This text is designed for higher level undergraduate and graduate programs. Course instructors will find that it provides a solid framework in which to promote student interaction and discussion on important issues in research methodology.

This user-friendly text takes a learn-by-doing approach to exploring research design issues in education and psychology, offering evenhanded coverage of quantitative, qualitative, mixed-methods, and single-case designs. Readers learn the basics of different methods and steps for critically examining any study's design, data, and conclusions, using sample peer-reviewed journal articles as practice opportunities. The text is unique in featuring full chapters on survey methods, evaluation, reliability and validity, action research, and research syntheses. Pedagogical Features Include: *An exemplar journal article at the end of each methods chapter, together with questions and activities for critiquing it (including, where applicable, checklist forms to identify threats to internal and external validity), plus lists of additional research examples. *Research example boxes showing how studies are designed to address particular research questions. *In every chapter: numbered chapter objectives, bulleted summaries, subheadings written as questions, a running glossary, and end-of-chapter discussion questions. * Electronic Instructor's Resource Manual with Test Bank, provided separately--includes chapter outlines; answers to exercises, discussion questions, and illustrative example questions; and PowerPoints.

Exploring Educational Research Literacy offers beginning classroom teachers a comprehensive introduction to the topic of educational research literacy—that is, the ability to read educational research articles in a systemic and critical way. Many beginning teacher education students are expected to be familiar with the latest research in their field, but are not necessarily researchers themselves. In fact, many new students have had little exposure to educational research. In this accessible text, Gary Shank and Launcelot Brown give students step-by-step guidance through the often baffling process of learning a new 'language' of research methods. Using clear and friendly language, and employing simple articles created to introduce students to important ideas in an engaging manner, Exploring Educational Research Literacy gives students the tools to shift from being passive consumers of research to active and critical readers capable of evaluating research and judging the usefulness of the findings for educational practice. Features include: CD-ROM including ten real research articles and eight "training" articles: Each lets students practice their research literacy skills and includes a list of questions to guide students in their reading" 'Practice Makes Perfect': end of the chapter reflection activities that prompt students to apply research skills described in each

consumers of empirical investigations and beginning researchers. Consumers locate, read, understand, critique, and then use the results of research to become more effective professionally and to make sound educational decisions. Beginning researchers need to know the fundamental process of conducting good research, a foundation for learning how to conduct research and report results. The book is designed to enable students to become intelligent consumers and proficient investigators of educational research. It is intended for a one-semester or one-term course in educational research and is best suited for advanced undergraduate and beginning graduate students in all areas of education. The examples from studies bring sometimes obtuse and dull research principles to life by showing excerpts from published articles. Students will find them interesting and informative. There are over 160 excerpts from recently published studies from 70 different journals, representing various levels of rigor and myriad subject areas. Although the excerpts focus on the field of education and educational publications, this book is also appropriate for students in related social sciences who need to learn how to read and understand research and begin the process of becoming investigators"--
