The EMD 567C, 567D3A, and 645 series engines are shown lined up at an open house in the 1980s. These engines are all very similar in outside appearance, and the 567 models are able to use many of the parts from the later 645 series. Photo from the "Inside EMD" slide lecture program by Preston Cook.

EMD 567 Engine in the 21st Century

The EMD 567 is a line of large medium-speed diesel engines built by General Motors' Electro-Motive Division. This engine, which succeeded Winton's 201A, was used in EMD's locomotives from 1938 until its replacement in 1966 by the EMD 645. It has a bore of 8 1/2 in, a stroke of 10 in and a displacement of 567 cu in per cylinder. Like the Winton 201A, the EMD 645 and the EMD 710, the EMD 567 is a two-stroke engine. GE, now makes EMD-compatible replacement parts.

EMD 567 - Wikipedia

Also, for information, 567C engines in some EMD locomotives use the same exhaust manifolds as 567B engines used, but in the 567C it is secured by bolts rather than studs. On the 567C the threaded holes for the exhaust manifold bolts do not extend through into the water manifold.

Engine Sounds – JointedRail.com

We have two units available of government surplus 16-567c units that only have 50-60 hours on them since new ! These are land based engines, but the tremendously low price could easily justify the governor swap cost for variable speed operation so they could be used as marine propulsion if required. These engines are rated at 1567hp at 900rpm. 1000kw generator ends and skid rails are included ...
