Science and politics are closely connected in today's global environmental issues. This book focuses on these links in relation to climate change, the threats to wildlife species, and natural hazards and disasters. Study of these reveals the need for more effective international cooperation and the limits of global governance.

Earth System Governance | Journal | ScienceDirect.com by ...

The Earth System Governance Project is the largest social science research network in the area of governance and global environmental change. ESG's international research programme takes up the challenge of exploring political solutions and novel, more effective governance systems to cope with the current transitions in the biogeochemical systems of our planet.

ESG - Earth System Governance | Future Earth

The Earth System Governance Project is a long-term, interdisciplinary social science research programme originally developed under the auspices of the International Human Dimensions Programme on Global Environmental Change. It started in January 2009. The Earth System Governance Project currently consists of a network of ca. 300 active and about 2,300 indirectly involved scholars from all continents. The global research alliance has evolved into the largest social science research network in the

Advancing Earth System Governance Research. Through Taskforces, the Earth System Governance Project seeks to push the frontiers of research in specific areas of its research agenda. Taskforces are open for all and often interact with other research communities all over the world. [read more.](#)

## Earth System Governance Project

Earth system governance is defined in this project as the interrelated and increasingly integrated system of formal and informal rules, rule-making systems, and actor-networks at all levels of human society (from local to global) that are set up to steer societies towards preventing, mitigating, and adapting to global and local environmental change and, in particular, earth system transformation, within the normative context of sustainable development.
