the Symposium on Experimental Pollination
pollination Subject Category: Miscellaneous
see more details Biology held on 25 October,
1980, at California State University, USA.
The topics discussed there provide material
for several detailed chapters, but many
additional topics have also been extensively
covered; the result is a comprehensive
textbook that will be of use to professional
ecologists, entomologists, botanists, and
crop scientists.

Introduction. Pollination is the transfer of pollen from anthers to a stigma, a process that can be effected by abiotic vectors such as wind and water and by a diversity of animals, including insects, birds, and mammals. It is worth noting, however, that the definition of pollination is somewhat variable, in that some authors (e.g., Faegri and van der Pijl 1979, cited under General Overviews) include the transfer of pollen in
