On Evo engines, 20% of oil pressure is sent to the bottom end and 80% is sent to the top end. 34) The oil pump is non-regulatory and delivers its entire volume of oil under pressure to the oil filter mount. When an engine is cold, the engine oil will be more viscous (ie., thicker).

EVO: Oiling & Lubrication - Sportsterpedia

The Evolution engine (popularly known as Evo) is an air-cooled, 45-degree, V-twin engine manufactured from 1984 by Harley-Davidson for the company's motorcycles. It was made in the 1,340 cc (82 cu in) displacement for Harley-Davidson Big V-twins bikes, replacing the Shovelhead engine until 2000 when the last Evo was placed in a production factory custom FXR4 (FXR2 and FXR3 were the first CVOs).

Harley-Davidson Evolution engine - Wikipedia

The Evolution (Evo) engine is a V-twin engine that has been manufactured by Harley-Davidson since 1984 for a variety of different motorcycle models. The engine design is often credited with saving Harley-Davidson from bankruptcy after the management buyout and subsequent reorganization that the company went through during the early 1980s.
