The Heat Treater's Guide Companion, created by ASM International and the ASM Heat Treating Society, provides ready reference data on more than 430 steel, aluminum, and magnesium alloys. Content includes chemical composition, similar U.S. and foreign alloys, characteristics, and recommended heat treating procedures.

?Heat Treater's Guide Companion on the App Store

Publication date: 2014. Volume 4D is a practical guide to heat treating irons and steels, and is particularly helpful in the context of selecting materials and determining part geometries and process plans. Filled with instructional information and data, it examines the effect of heat treating on the structure, properties, and performance potential of cast iron, carbon and low-alloy steels, tool steels, stainless steels, bearing steels, and gear steels.
