Rishi Singh in the US . We found 41 records in 23 states for Rishi Singh in the US. The top state of residence is New York, followed by California. The average Rishi Singh is around 52 years of age with around 60% falling in to the age group of 41-60.

The subject “ Irrigation Engineering ” has assumed importance since last 30 to 40 years. Continued increase in population, particular in developing countries, at a very fast rate has caused scarcity of food. The real answer to food problem, is increased production of food articles; which is possible only by artificial irrigation of fields. India has a very large potential for irrigation, because area and water resources both are abundantly available. Abundance of area for irrigation arid availability of lot of water resources are probably the reasons that most of the early irrigation practices and theories were developed in India. There is lot of variations in rainfall in different regions of India. Some of the areas have very little rainfall insufficient to grow any crop. Other areas have sufficient rainfall but its distribution is not as required by the crops. Scanty rainfall and erratic distribution both necessitate artificial irrigation. The purpose of this book is to present the subject in most concise form. Simplicity of language is the main feature of the book. The book is completely in MKS units and covers the syllabus of all the Indian Universities, State Technical Boards, and A.M.I.E. (India) examinations. The book should be equally useful to practicing Engineers as reference book. Examples of almost all the important irrigation works have been solved and then illustrated in neat drawing charts. Khosla ’ s Charts, Lacey ’ s and Garret diagrams all are in MKS units. Rajsons Publications Pvt. Ltd. Every

effort was made to eliminate printing errors. I would appreciate if printing errors are brought to my notice and Suggestions to bring about improvements in the book are most welcome. I am thankful to all my friends who have rendered great help by their valuable suggestions. In last I am thankful to Shri R.K. Jain, Prop. Standard Book House, without whose efforts this venture would not have reached the readers.

ABOUT THE BOOK: feel proud in issuing the Seventh Edition of the book "Building Construction and Materials". The subject " Building Construction and Materials" is a very vast and tedious subject of Civil Engineering. Author has tried to explain all the aspects of this subject in a very simple and lucid language. The Book is entirely in SI Units. The book covers the syllabi prescribed by all the Indian universities, State Technical Boards and A.M.I.E. (India) examinations. The book is also very useful for Engineers involved in construction industry. All the relevant I.S.I. Recommendations and other useful data have been incorporated in the book. Author has tried to explain all the aspects with the help of lot of neat drawings. It is hoped that the book will satisfy all the needs of the students and practising engineers in regard to this subject. In order to increase the usefulness of the book basic engineering materials have been added in this revised 17th edition. Basic engineering material like stone, bricks, lime, cement, timber and iron has been added in this edition. **RECOMMENDATIONS:** A textbook for all Engineering Branches, Competitive Examination, ICS, and AMIE Examinations In S.I Units For Degree, Diploma and A.I.M.E. (India) Students and Practising Civil Engineers. **ABOUT THE AUTHOR:** Dr. Gurcharan Singh Joint Director (Retd.) Directorate of Technical Education Rajasthan, Jodhpur **BOOK DETAILS:** ISBN : 978-81-89401-21-4 Pages: 933 + 26 Edition: 17th, Year-2019 Size(cms): L-23.7, B-15.8, H-3.7 For more Offers visit our Website: www.standardbookhouse.com

Isometric Projection * Perspective Drawing * Masonry * Foundations, Roofs and Fire Places * Design of Buildings * Arches and Lintels * Cavity Walls, * Scaffolding and Shoring, * Stairs * Joinery * Wooden partition * Wooden Floors * Door and Windows * Trusses * Pitched Roof Covering * Graphical Solution of Trusses * Connections of Steel Structures * Plate Girder * H.R.C.C. Structures * Sewers and Drains * Pipes and Pipe Joints * Sanitary Fittings * Septic Tank and Cesspool * Water Supply Structures * Swimming Pool * Irrigation Structures * Culverts and Bridges * Railway and Roadcross Sections * Machine Drawing * Principles of Planning and Designing a Building.

Book is meant for Architectural and Civil Engineering Students, Practising Architects and Consultants H Book covers the Most Modern Techniques of Planning Designing and Scheduling H Useful Plans for Various Types of Building are Given in Ample Number. **CONTENTS** Introduction * Town Planning * Introduction to Architecture * Principles of Architectural Composition * Building Bye-Laws * Site Selection * Orientation * Principles of Planning and Buildings * Sun and the Buildings * Design of Residential Buildings * Design of Educational Buildings * Hospitals and Dispensaries * Hotels * Shopping Centre and Banks * Industrial Buildings * Buildings for Recreation * Government Offices and Other Buildings * Buildings Services * Management of Construction Works * Network Analysis C.P.M. and PERT.

In the book, author has made every effort to incorporate all the relevant I.S.I. Publications, C.B.R.I. Publications, various P.W.D. Hand Books, Bridge Codes, Building Bye-Laws, National Building Codes, 1970, I.R.C. Recommendations and Railway Board's dimensional Schedule for various railways. This book is completely in M.K.S. and S.I. Units. **CONTENTS** Quantities, Units and Conversion Factors * Mathematics *

Building Material * Timber and Allied Products* Metallurgy * Loads on Building * Code of Building Bye-Laws * Important Elements of Building * Masonry Structures * Soil Mechanics and Foundation Engineering * Wire Ropes H Structural Tables and Dimensions * Mechanics of Structures * Steel Structures * Roofs * Ventilation and Air-Conditioning of Building * Building Miscellaneous * Plain Cement Concrete * Reinforced Cement Concrete * Hydraulics * Irrigation Engineering * Water Supply Engineering * Sanitary Engineering * Roads and Highway Engineering * Railways H Bridges and Culverts * Measurements, Evaluation and Estimating * Earth-quake Engineering * Plastic Theory of Ultimate Load Design * Pre-Stressed Concrete * Surveying * S.I. Units

This fourth edition of Plant Systematics is completely revised and updated. It incorporates the updated International Code of Nomenclature for Algae, Fungi and Plants (Shenzhen Code, 2018), the new version of PhyloCode (Beta version of PhyloCode 5, 2014), APweb version 14 (September, 2018), revised Angiosperm Phylogeny Group classification (APG IV, 2016), new Pteridophyte Phylogeny Group Classification (PPG I, 2016), besides the updates since the publication of third edition. The book is a blend of classical fundamental aspects and recent developments, especially in the field of molecular systematics, cladistics and computer identification. Special attention has been given to information on botanical nomenclature, identification, molecular systematics and phylogeny of angiosperms. The complicated concepts of phylogeny, taxometrics and cladistics have been explained with a view to providing a comparison between these diverse but interactive fields of study. An attempt has been made to build upon a common example when exploring different methods, especially in procedures of identification, taxometrics and cladistics. The major systems of classification are evaluated critically. Discussion on major families of Pteridophytes, Gymnosperms and Angiosperms, especially those of major phylogenetic interest, form a major portion of this edition. The ebook includes nearly 500 color photographs set out in 36 pages covering plants from different parts of the world. In addition, 305 black & white illustrations have been included to provide a better understanding of the plants covered in the book.

India's military history goes back to the Indus or Harappan people who flourished 5,000 years ago; the history of military fortifications in the country goes back even further. It remains, however, a subject largely neglected by the country's historians. This book traces the evolution of India's military tactics and strategy during the ancient period and till the eleventh century ad by examining available sources from a dispassionate, professional military perspective. The author analyses the military factors which led to the end of the Harappan civilization. The Rig Veda contains a great deal of information about battles fought by the Aryans. The author makes use of the description of the first recorded battle, the Dasrajan War fought around 1900 bc, as a basis for reconstructing the strategy and tactics employed by the combatants. The portion of Kautilya's Arthashastra dealing with matters military has been examined at some length because it exercised a profound influence on the tactics of Indian warfare for over a millennium. Such loyalty to the injunctions of the shastras bred extreme conservatism in military doctrine and often effectively prevented progress and innovation in the art of war. Learning from experience, the Guptas repudiated Kautilya's static concept and successfully defended the country against the Hunas. This work traces how a subsequent reversion to tradition and the antiquated Kautilyan system led to tragic consequences.

Introduction * History of Development of Roads * Highway Planning * Highway Economics and Finance * Road Alignment and Survey * Highway Geometrics * Highway Drainage * Hill Roads * Traffic Engineering * Road Arboriculture * Highway Machinery * Highway Sub-Grade Soils * Stone Aggregates * Aggregate Blending Procedures * Bituminous Materials * Bituminous Paving Mixes and Mix Design * Constructing the Road Formations * Design of Flexible Pavements * Design of Cement Concrete Roads * Low Cost Roads * Stabilized Roads * Construction of (WBM) Roads * Bituminous Roads * Cement Concrete Roads * Layout of Urban Roads, Pavings and Ribbon Development * Highway Failures and Maintenance.

This Volume Is A Modernist Study Of India'S International Relations, Which Traverses Pre-Colonial, Colonial And Postcolonial Perspectives. Its Fourteen Chapters Discuss Varied Subjects Related To South Asia'S Regional And International Relations, Like: (I) The Institutionalization Of British Paramountcy In India And Its Effect On The Region'S External Relations, As Well As Indigenous Responses To Colonial Rule (Ii) The Influence Of Domestic Variables Upon India'S International Relations (Iii) The Interspersion Of Ethnic, Economic And Religious Factors In The Making Of The British Indian Empire, And Later, Of The Indian State (Iv) The Paradigms Of Nature, Culture, State-Making On The One Hand, And Political Ecology And Cultural Politics Of Natural Resources On The Other (V) The Changing Character Of Foreign Corporate Involvement In India (Vi) The Development Of Science And Technology In India And The Activities Of The Armed Forces In India (Vii) The Fostering Of Formal Arrangements Such As Saarc Or Safta In South Asia And Informal Challenges To India'S Security From Non-State Actors (Viii) The Economic, Political And Cultural Consequences Of Globalization For India During The Imperial-Colonial Phases (Ix) The Evolution, In Creative Writing, Of A Discourse On The World Outside India And On India'S Relationship With It. This Volume Will Be Of Interest To Scholars And Students Of South Asian Studies, History, Political Science And International Relations, And Defence Studies.
