Create Root User in CentOS / RedHat 8 | IT Blog

A root is the basic element of a word, and it is the foundation on which the meaning of a word is built. Many roots are real words in their own right: graph (a diagram) and term (a fixed time or date), for example. Although these roots can have other elements, they don ' t need other elements to be complete. Most roots, however, do need other elements.

Tending to Word Roots - dummies
