Intelligence as an Investigative Function
Intelligence and investigation are key components of criminology. Although they look deceptively similar, fundamental differences exist in various areas of their components such as: purpose of final product, time orientation, data gathering and analytical techniques, skill set requirements, nature of conclusion and dissemination of information. Intelligence is a product created through the process of collecting, collating, and analyzing data, for dissemination as usable information to inform ...

Difference Between Intelligence And Investigation - Bohat ALA
Introduction. Investigators do not usually need to set an intelligence strategy for volume crime investigations. The force and local tasking and coordination group (T&CG) processes have a defined intelligence requirement based on the strategic assessment. Volume crime investigators should be aware of the intelligence sources available to them at local and force level, and how these sources can be tasked and used to assist in developing intelligence (see open sources and closed sources).
