Fuel is injected directly into the cylinder (or into a prechamber which is connected to the cylinder for indirect injection engines), just before (some 5 CAD) the desired start of combustion. High pressure injection produces small, high velocity fuel droplets which vaporize rapidly in the sprays.

Engineering Fundamentals Of The  
Internal Combustion Engine ...

In an internal combustion engine, the expansion of the high- temperature and high- pressure gases produced by combustion applies direct force to some component of the engine. The force is applied typically to pistons,

# Download Free Internal Combustion Engine

turbine blades, rotor or a nozzle. This force moves the component over a distance, transforming chemical energy into useful work.
