A theory is a related set of concepts and principles - about a phenomenon - the purpose of which is to explain or predict the phenomenon. Why theory is important. 1. Theory provides concepts to name what we observe and to explain relationships between concepts. Theory allows us to explain what we see and to figure out how to bring about change.

Erik Erikson was a stage theorist who developed Freud's "Psychosexual Theory" and adapted it into a psychosocial (having both psychological and social aspects) theory encompassing eight stages. According to Erikson, we experience eight stages of development during our life span. Within each stage, there is a dilemma that we must resolve in order to feel a sense of competence and will allow us to develop as a well-adjusted adult.
