### Home - International Safe Transit Association

ISTA Standard 1A Non-Simulation Integrity Performance Tests ISTA 1A is for packaged-products 150 lb. (68 kg) or less, and challenges the strength and robustness of the product and package combination to withstand transport hazards. Procedure 1A is useful particularly when used as a consistent benchmark over time.

### ISTA Standard 1A - Medical Package Testing

ISTA has two types of tests - Performance Tests result in a Pass/Fail assessment and are used to determine the viability of a packaged-product to survive normal shipment. Development Tests compare relative performance of two or more designs or the same design from different suppliers. ISTA® Test Series - Test protocols are also grouped into what ISTA calls a Series.

### Test Procedures - International Safe Transit Association

Sep 24, 2018 ISTA (International Safe Transit Association) is an organization that develops testing protocols and design standards that define how packages should be in order to guarantee the protection of their content during the transportation cycle.

### ISTA Procedure 1A 01-06

1994 - After nearly twenty years of technical stagnation the organization officially adopted its current name, International Safe Transit Association which is often called I.S.T.A or pronounced as the word ISTA and made the decision to add some of the testing technology to its test procedures.

### History & Mission - International Safe Transit Association

Test Procedure 1A is an integrity test for individual packaged-products. □ It can be used to evaluate the performance of a packaged-product. □ It can be used to compare relative performance of package and product design alternatives. □ The package and product are considered together and not separately. □ Some conditions of transit, such as moisture, pressure or unusual handling, may not be covered.
