The John Deere 1200A Bunker and Field Rake helped debunk the theory that it takes an expensive all-wheel-drive machine to perform well on golf courses, sports fields, or new-course construction projects. The 1200A features the same job-proven drivetrain found in the popular John Deere Gator 4x2 Utility Vehicle.

Based on a true-life journey, The Straight Story chronicles 73-year-old Alvin Straight and his travels from Laurens, Iowa, to Mount Zion, Wisconsin, on a 1966 John Deere riding lawnmower. His trip takes him across hundreds of picturesque miles of America's Heartland, into a variety of people's lives, and all the while he shares his simple but poignant insights. Despite crippling arthritis and poor vision, Straight is resolved to travel by his own means to make peace with his ailing brother. His trek and the incidents that he experiences on the road provides a triumphant and inspirational representation of the course of a lifetime as it nears its end.

From windswept tundra to humid subtropical everglades, fromgracious coniferous forests to austere deserts, North America isblessed with an incredibly diverse array of natural environments,each supporting a unique system of plant and animal life. Thesesystems--also known as biomes--are tightly woven webs of life thathave taken millennia to evolve. This lavishly illustrated bookintroduces readers to this extraordinary array of naturalcommunities and to the subtle interactions of minerals, plants, andanimals that take place within them. Professor Eric Bolen takes a qualitative, intuitive approach to hissubject, beginning with an overview of essential ecological termsand concepts, such as competitive exclusion, taxa, niches, andsuccession. Then, biome by biome, he covers the entirety of Canadaland the United States, starting with the tundra of the far northand working his way south and then west to conclude in the desertsand chaparral of southern California. Along the way, he delves intopertinent conservation issues and features fascinating historicalvignettes and original documents detailing human impact on variousenvironments--for instance, the role of John Deere's plow insettling grasslands, and the use of fur records from Hudson's BayCompany. Throughout, he enlivens the text with dozens of exquisitephotographs and illuminating maps, graphs, charts, andtables. Ecology of North America is an ideal first text for studentsinterested in natural resources, environmental science, andbiology, and it is a useful and attractive addition to the libraryof anyone interested in understanding and protecting the naturalenvironment.

The story of how an Iowa farmer-inventor fought the industry giants and created one of the largest private farm equipment manufacturers in the world

The author of The John Deere Way journeys behind the scenes of Toyota and traces its twenty-five-year rise from humble Japanese start-up to become the world's largest auto manufacturer, drawing on interviews with company executives to reveal the corporate culture that has led to Toyota's success. Reprint.

Racial tension, a forbidden love affair, and murder are seen through the eyes of a seven-year-old boy in a 1950s southern cotton-farming community.

Household and Class Relations offers an adept and multifaceted look at modern peasant family relation- ships. With the perspectives of an anthropologist and sociologist as well as those of an economist, Deere brings a fresh approach to the classic question: how do households continue to exist as units of production and reproduction in the face of their growing proletarianization and impoverishment? She draws upon rich life histories as well as archival and survey research to provide a regional history of the northern Peruvian highland province of Cajamarca since the turn of the century. Beginning with an examination of the hacienda system in the first four decades of this century, Household and Class Relations goes on to probe the development of agrarian capitalism in the postwar period and the peasant economy of the 1970s. With this background firmly in place, Household and Class Relations then distinguishes itself through attention to the interaction between class and gender. Deere argues that the subordination of women has had high costs for the well-being of rural households, exacerbating peasant poverty. Further, she shows how peasant households have adopted a strategy of participating in multiple income generating activities in order to survive. Breaking new ground, her study examines how gender relations interact with class relations to explain social differentiation among peasants. This is an exciting and stimulating study that will appeal to Latin Americanists, scholars of women's studies, and economists. Wide-ranging and incisive, it will garner attention from many quarters. Household and Class Relations offers an adept and multifaceted look at modern peasant family relation- ships. With the perspectives of an anthropologist and sociologist as well as those of an economist, Deere brings a fresh approach to the classic question: how do households continue to exist as units of production and reproduction in the face of their growing proletarianization and impoverishment?
