That is how the Learn Math
Fast System can teach two
years of math in about two
months. Other topics taught
in volume 2 include cross
multiplying, cross
canceling, mixed numbers,
negative numbers, and
reducing fractions. These
concepts are typically
taught in the fourth and
fifth grade, but there is no
mention of grade level
anywhere in the book. Each
book cover looks as
intellectual as the last, so
older kids won't be
embarrassed to carry a book
that is below their grade
level.
