Learning in the now of work embeds learning into the work itself, rather than removing workers from their jobs. Does this mean the end of traditional learning methods?

Four Practices to Embed Learning in the Flow of Work Learning is the top-rated challenge among 2019's Global Human Capital Trends. People now rate the opportunity to learn as among their top reasons for taking a job, and business leaders know that changes in technology, longevity, work practices, and business models have created a tremendous demand for continuous, lifelong development. Leading organizations are taking steps to deliver ...

enterprise learning framework | Josh Bersin One of the basic tenets of building an organization ready for the future is intentionally designing it for speed, agility, and adaptability. In such an environment, continuous learning and innovation tend to become the norm, which in turn often impacts how organizations structure their work, design their teams, develop their employees, and address the changing nature of work itself.
