Rifle Cartridge

Carefully pour a properly measured charge of black powder into the chamber closest to the loading cutout. Repeat for each chamber. Use an individual powder measure. Do not pour powder from a large powder flask or can. The exact amount of powder

Access Free Loading The Black Powder Rifle

will vary depending on the type of gun.
For a .36, use 12 grains of powder.

~~How to Load a Black Powder Revolver
(with Pictures) - wikiHow~~

Measure your powder using an
adjustable powder measure. Do not
weigh out the powder charges on a

Access Free Loading The Black Powder Rifle

Cartridge scale. Black powder measures more consistently by volume. Set your adjustable measure for an amount in grains equal to the caliber of your rifle. For our 50 caliber rifle that translates to 50 grains of black powder.

~~Black powder licences here's what
you need to know~~

Black powder is very volatile and subject to ignition from sparks or even static electricity, so you want to deal with the smallest amounts possible while loading your rifle. Pyrodex is less sensitive and less apt to absorb

Access Free Loading The Black Powder Rifle

moisture. It's also easier to clean and easier to store safely. For beginners I highly recommend Pyrodex products.
