~~Introduction to Economics: Macroeconomics | edX~~

economics: Macroeconomics As stated earlier, macroeconomics is concerned with the aggregate outcome of individual actions. Keynes’s “consumption function,” for example, which relates aggregate consumption to national income, is not built up from individual consumer behaviour; it is simply an empirical generalization.

~~Macroeconomics—Later developments | Britannica~~

Macroeconomics, on the other hand, can be thought of as the “big picture” version of economics. Rather than analyzing individual markets, macroeconomics focuses on aggregate production and consumption in an economy, the overall statistics that macroeconomists miss. Some topics that macroeconomists study include
