Impatient Woman's Guide to Getting Pregnant is a complete guide to the medical, psychological, social, and sexual aspects of getting pregnant, told in a funny, compassionate way, like talking to a good friend who's been through it all. And in fact, Dr. Jean Twenge has been through it all—the mother of three young children, she started researching fertility when trying to conceive for the first time. A renowned sociologist and professor at San Diego State University, Dr. Twenge brought her research background to the huge amount of information—sometimes contradictory, frequently alarmist, and often discouraging—that she encountered online, from family and friends, and in books, and decided to go into the latest studies to find out the real story. The good news is: There is a lot less to worry about than you've been led to believe. Dr. Twenge gets to the heart of the emotional issues around getting pregnant, including how to prepare mentally and physically when thinking about conceiving; how to talk about it with family, friends, and your partner; and how to handle the great sadness of a miscarriage. Also covered is how to know when you're ovulating, when to have sex, timing your pregnancy, maximizing your chances of getting pregnant, how to tilt the odds toward having a boy or a girl, and the best prenatal diet. Trying to conceive often involves an enormous amount of emotion, from anxiety and disappointment to hope and joy. With comfort, humor, and

straightforward advice, *The Impatient Woman's Guide to Getting Pregnant* is the bedside companion to help you through it.

Infertility medicine today is all about aggressive surgical, chemical and technological intervention. But making babies originally was - and is still best as - a natural process. In the UK it is estimated that approximately 1 in every 6 couples have difficulty conceiving and 1 in 80 babies is born as a result of IVF treatment. While 75% of people seeking help with their fertility try alternative treatment, few doctors are aware of how the disciplines of Western and Eastern fertility treatment can be used together to achieve the best results. This is a unique collaboration that combines the best of Dr David's and Jill Blakeway's expertise. In *THE FERTILITY PLAN* they show that half of women who use IVF could have got pregnant without it if the right knowledge and advice were available to them, and they share their proven 3-month plan to help couples conceive a baby as naturally as possible.

In *The Infertility Cure*, Dr. Lewis outlines her simple guidelines involving diet, herbs, and acupressure so that you can make use of her experience and expertise to create a nurturing, welcoming environment for a healthy baby. Dr. Randine Lewis offers you a natural way to
