First, She Seduced Them. . . Sheila LaBarre liked to troll the personal ads and homeless shelters, looking for men whom society had rejected for one reason or another--men she could easily dominate both verbally and sexually. One by one, she invited them to her remote New Hampshire farmhouse, where she engaged them in S&M. But over time, sex gave way to brutal acts of torture as she mercilessly flogged and beat her captives until they confessed to committing unspeakable acts. Once satisfied that they had paid for their sins, Sheila savagely slaughtered them and burned their remains on her farm. . . Then, Humiliated, Tortured, And Killed Them. . . From the disturbing audiotapes Sheila made of her victims' confessions to her own bizarre statements in which she claimed to have returned from the dead to be

God's avenger, The Burn Farm takes you behind the scenes of the scandal that rocked a quiet New England town, and into the twisted, depraved mind of a manipulative, cold-blooded murderer. . . Includes 16 Pages of Shocking Photos

Following the success of the Haynes Thunderbirds Manual, the same author/illustrator team turn their attention to Captain Scarlet, another iconic sci-fi creation of the late Gerry Anderson. This fascinating manual is a technical guide to Spectrum, the global security service of 2068, and features background information, a history of its creation, profiles of leading agents, confidential details of Spectrum's most valuable weapon in the fight against the Mysterons, and fully annotated cutaway drawings of Spectrum vehicles. The book finishes with comprehensive Mission Files, making it the complete and essential manual for all Spectrum Agents.

A proliferation of lawsuits involving sport utility vehicles, defective tires, medical devices and drugs, and asbestos abounds. Public attention to products liability cases is at an all-time high, and awards routinely run into the millions of dollars. When developing a strategy in this high stakes world, attorneys can't afford to have anything other than the best information and insight into this evolving area of law. Lawyers need practical tools to assess a products liability case's potential and build their approach, and Shapo on the Law of Products Liability provides the tools to give you the winning edge. Through a holistic analysis of the law and its principal developments as witnessed in hundreds of cases, this treatise gives litigators a wide variety of perspectives on potential strategies, and the tools to support those strategies with persuasive arguments. This authoritative two-volume work will enable you to: Assess products liability case potential and build sound litigation strategies Dig deep into products liability law to build creative approaches to litigation Craft a winning case and reap the greatest reward for your clients Find the tools and information to support strategies with persuasive arguments Both federal and state courts contribute a rich mix of decisions to products liability law, which covers both consumer products and occupational hazards. This indispensable resource for the products liability practitioner helps you prepare your case. Is the product defective? Who is liable? What is the manufacturer's responsibility? Who can be sued? What kind of awards may be realized? How might this be defended? Shapo on the Law of Products Liability also includes coverage of: Asbestos litigation Chinese drywall Food and drug Medical devices Design/manufacturing defects claims Punitive damages Discovery rule Up to date analysis and commentary History and background on products liability law Damages Advertising material Packaging Marshall S. Shapo, the Frederic P. Vose Professor at Northwestern University School of Law, is a nationally recognized authority on torts and products liability law.

A useful reference for home inspectors, home sellers, home buyers, and realtors.

The Haynes Medieval Castle Manual explores the background story to castle construction in Medieval Europe, showing that castles had both a domestic and defensive function. It uses the 'new' medieval castle-building project at Guédelon in Burgundy as the centerpiece for the book, examining the construction and anatomy of these awe-inspiring structures, section by section. Life inside the castle walls is explored, from the perspectives of the lowliest servants to the mighty lords and all those ranks in between. Ordinary daily routines to how a castle's inhabitants would have been fed and watered and the building itself heated and furnished are also covered. When it came to survival in times of unrest, the castle presented would-be assailants with a formidable array of defensive measures, some of which were truly frightening in their ability to inflict injury and death.

For the aficionado of farm equipment, or the scion of an old farming family nostalgic for the old days, or the grown-up boy who still loves a classic piece of old-time machinery, the vintage tractor can be a thrilling find like no other. This book tells dozens of stories of such discoveries, of the treasured old tractor parked in a shed since 1927, of the pristine model unearthed at an estate sale, of the broken-down old beauty stashed in a barn where generations of children have made their secret hideaways. These are the classic tractors that are often as hard to find as a needle in a haystack—but far more fun to discover, as all of these delightful stories make abundantly clear.
