Newsmax Newsletters Brownstein Issues Prostate

Brownstein warns that cancer of the prostate is the second most deadly type of cancer for men in the United States. It takes over as the leading cause of cancer-related death for men once they reach age 75. Most prostate problems begin with enlargement and inflammation.

Dr. Brownstein These 5 Things Trigger Prostate ... - Newsmax

As prostate size increases with age, men experience an increase in common urinary issues like frequent urination, leaking or dribbling of urine, getting up multiple times at night to urinate, and others ” Dr. Brownstein warns. Because prostate problems are so prevalent for men over 50, Dr. Brownstein has collaborated with Newsmax Health on a special free video presentation to help the public discover more information about enlarged prostate problem and other prostate-related issues.

Dr. David Brownstein Discusses Prostate Concerns

Dr. Brownstein's Answer: The prostate gland is an endocrine gland located near the rectum and the urethra. As a man ages, the prostate can enlarge and impinge on the urethra causing problems with urinary flow. Men with prostate problems will often complain of urinary frequency, difficulty in starting urination, and an inability to empty the bladder.
