NXT-G is a graphical computer programming language specifically designed to program the LEGO MINDSTORMS NXT robotics kit. Based on LabVIEW, NXT-G features a drag-and-drop development environment with graphical function blocks and "sequence beams" for connecting functions and directing the flow of a program. NXT-G is designed for programs to be written in a fully-graphical environment, without requiring a single line of code.

LEGO Mindstorms NXT is a programmable robotics kit released by Lego in late July 2006. It replaced the first-generation Lego Mindstorms kit, which was called the Robotics Invention System. The base kit ships in two versions: the Retail Version and the Education Base Set. It comes with the NXT-G programming software, or optionally LabVIEW for Lego Mindstorms. A variety of unofficial languages exist, such as NXC, NBC, leJOS NXJ, and RobotC. The second generation of the set, the Lego Mindstorms NXT

Programming using NXT-G is entirely graphical. No programming knowledge is required to produce advanced programs using NXT-G. Strictly speaking, you will not create any lines of code using NXT-G. By default, the work area only shows a starting point. From this starting point, you drag and drop one of the boxes from the palette.
