In smaller organizations, there can be overlap between operations and supply chain management. One person or department can manage or play a role in both supply chain and operations. In part this is because Supply Chain Management has become more complex over time and the demand for highly trained professionals has emerged.

Operations Management and Supply Chain Management

Supply chain management operations govern the overall structure of how a business plans, creates, receives, and fulfills products. Often referred to as OSCM (operations and supply chain management), it involves monitoring, maintaining, and improving a wide spectrum of both internal and collaborative processes.

Operations and Supply Chain

Management: The Core

Operational supply chain decisions are made hundreds of times each day in a company. These are the decisions that are made at business locations that affect how products are developed, sold, moved, and manufactured. Operational decisions are made with an awareness of the strategic and tactical decisions that have been adopted in a company.
