Now in its sixth edition, School Programs in Speech-Language Pathology: Organization and Service Delivery continues to be a vital resource for faculty, graduate students, school-based practitioners, and program administrators who strive to make a difference in the school setting. The text provides practical solutions and strategies to tackle the challenges faced in the complex and ever-changing education landscape. The authors aim for the book to be an excellent opportunity to stimulate new ways of thinking about the critical role speech-language pathologists (SLP) play in children's education and social development. It provides a foundation for understanding where SLP programs fit within the school organization. SLPs will be motivated to collaborate with colleagues, lead discussions about the link between communication and learning, and introduce innovative models for delivering services. School Programs encourages SLPs to embrace their positions on school teams, share knowledge to make services educationally relevant and help children reach their highest potential. School Programs in Speech-Language Pathology focuses on service delivery, program design, interprofessional collaboration, and how to organize and manage an effective program. Additionally, it covers meeting state and national standards, following federal mandates, and how to relate to and communicate with colleagues and parents. Finally, it encourages readers to grow professionally and enjoy their career as a school-based SLP. A strong grounding in basic histology is essential for all pathologists. However, there had always been a gap between histology and pathology in which histologic information specifically for the pathologist was often lacking. Histology for Pathologists deals with the microscopic features of normal human tissues, from the perspective of the surgical pathologist. This is the only text that uses human (vs. animal) tissues for the histology. It is the best reference in the literature for information on normal histology, and, as such, is essential for all clinical pathologists. Written by pathologists for pathologists, the new edition updates the pathologist's understanding of normal histology up to date with the incremental advances made in the last five years. The 3rd edition has become a "classic" purchased by virtually all residents beginning their pathology training, as well as pathologists in practice. The 4th edition builds on that substantial foundation. The table of contents remains essentially the same with the exception of some changes in authorship.

This text responds to the growing need for speech-language pathologists in school settings by asking how factors including people, work, pay, opportunities for promotion, and supervision impact the overall job satisfaction of school-based speech-language pathologists. Drawing on data from a quantitative study conducted in schools in the US, the text foregrounds the experiences and perspectives of speech-language pathologists working in the public school sector, and illustrates the critical role of effective and supportive educational leadership and administration in ensuring effective recruitment, retention, and job satisfaction amongst these much needed professionals. The text highlights growing responsibilities of speech-language pathologists in schools and considers recruitment and challenges in the sector can be remedied by greater understanding of how job satisfaction relates to speech-language pathologists ' experiences and perspectives on pay, work, opportunities for promotion, and support from a supervisor. This short text is aimed at researchers, scholars, and administrators in meeting the growing needs of children and students with speech and language difficulties in Early Childhood, Elementary, and Secondary education settings . The text will be particularly valuable for school leaders looking to support speech-language pathologists in their setting.

The Practitioner's Path in Speech-Language Pathology: The Art of School-Based Practice bridges the gap between theory and practice, evidence-based practice and practice-based evidence, and the science and artistry of speech-language pathology. This book takes a critical look at areas related to wellness, professional development, and growth that can impact the personal self along with the professional self. It examines each area through an overview of inter-disciplinary research in addition to personal narratives illustrating key principles and strategies and offers the reader a professionally balanced perspective. The first section of the book helps us understand the importance of building a foundation for our clinical path through a discussion about scientific and evidence-based principles, different types of knowledge systems, and development of wisdom. The second section of the book helps us understand the importance of supporting our foundation through an introduction to reflection, counsel and care, balance and harmony, growth and detachment. The third section of the book includes chapters that serve as pillars of practice: organizational frameworks, materials and activities, measuring progress, best practices, and the importance of community. The fourth and final section of the book highlights shared vision, clinical expertise, emotional intelligence, leadership trends, the scholarship of teaching and learning, and research dissemination. This book challenges us to consider our own perceptions about the explicit nature of professional practice, and facilitates the development of four attitudes that can have a profound impact on both clinical success and professional satisfaction: a scientific attitude, a therapeutic attitude, a professional attitude, and a leadership attitude. It contains a blend of clinical evidence and research, practitioner views, common sense, philosophical stances, and historical overviews. The Practitioner's Path in Speech-Language Pathology is designed for students and practitioners who are actively involved with the process of knowledge acquisition, and targets issues we encounter along our path to becoming reflective practitioners, as they relate to the excellence behind and scholarship within teaching and learning.
