pacing. The aim of pacing is to gradually help you to balance out your levels of activity and rest. The first stage is to work out your baseline activity level. This is the amount of activity that you can do knowing that your pain won't flare up. A flare up is an increase in pain, often suddenly, that prevents you from doing any activity.

NHS Trust Pacing – how to manage your pain and stay active

The majority of our Pacing for people with M.E. booklet focuses on this sort of pacing. The NICE guideline for M.E. (undergoing essential updates, though this process is on hold due to the Coronavirus pandemic) says: "In this guideline, pacing is defined as energy management, with the aim of maximising cognitive and physical activity, while avoiding setbacks/relapses due to overexertion.

Pacing and Goal Setting - Pain Management - painHEALTH

The result is usually more pain later that day or for many days after. Unfortunately, this pattern (known as boom / bust) is not helpful for the body as we need consistent exercise to maintain our health and fitness. Pacing is all about learning how to break tasks into smaller more manageable components and taking frequent breaks.

- Cardiac pacing involves the fitting of a pacemaker to regulate the heart rate. - A pacemaker is a small, battery-operated device that enables the heart to maintain a regular rhythm. - Some pacemakers are permanent (internal) and some are temporary (external). - The battery in a permanent pacemaker should last 5-15 years.

Cardiac pacing. | Nursing Times

When living with fibromyalgia (FMS) and chronic fatigue syndrome (ME/CFS), pacing is key to managing your symptoms. With the busy lives most of us lead, that's easier said than done! Still, with some effort, you can learn to pace yourself. And you'll be glad you did.

Pacing is a multidimensional coping strategy and complex behaviour. The message is clear that pacing should enable increases in meaningful activities, as opposed to attempting to avoid symptoms. The survey findings have informed the development of an activity pacing framework to guide healthcare professionals on the multiple components of pacing.
