Digital Leadership, Second Edition thoughtfully presents the research and actions needed for leading a school culture to find relevancy and utility in the digital tools that ignite innovative learning and maximize achievement. Using illuminating explanations, engaging stories, and informative graphics the author presents steps to "prepare kids to do anything, not something."

Lead for efficacy in these disruptive times! Cultivating a school culture focused on the achievement of students while anticipating change is imperative, but it's tough to keep up with varying leadership demands when it seems like society and technology are constantly changing as well! Moving beyond the skills and tools introduced in the first edition, this revamped second edition features: New organization emphasizing the interconnectivity of the Pillars of Digital Leadership Innovative strategies and leadership practices that enhance school culture and drive learning improvement Updated vignettes from digital leaders who have successfully implemented the included strategies New online resources, informative graphics, and end of chapter guiding questions

Facebook, Twitter, Google...today's tech-savvy students are always plugged in. However, all too often their teachers and administrators aren't experienced in the use of these familiar digital tools. If schools are to prepare students for the future, administrators and educators must harness the power of digital technologies and social media. With contributions from authorities on the topic of educational technology, What School Leaders Need to Know About Digital Technologies and Social Media is a compendium of the most useful tools for any education setting. Throughout the book, experts including Will Richardson, Vicki Davis, Sheryl Nussbaum-Beach, Richard Byrne, Joyce Valenza, and many others explain how administrators and teachers can best integrate technology into schools, helping to make sense of the often-confusing world of social media and digital tools. They offer the most current information for the educational use of blogs, wikis and podcasts, online learning, open-source courseware, educational gaming, social networking, online mind mapping, mobile phones, and more, and include examples of these methods currently at work in schools. As the book clearly illustrates, when these tools are combined with thoughtful and deliberate pedagogical practice, it can create a transformative experience for students, educators, and administrators alike. What School Leaders Need to Know About Digital Technologies and Social Media reveals the power of information technology and social networks in the classroom and throughout the education community.

Providing models of exemplary use and the latest research, Educational Leadership and Technology reveals the transformational power of emerging technologies to improve student learning, and explores how leaders can bring about this technology integration. This book provides an overview of roles and strategies expected of effective school leaders, as well as some of the complex issues they face. Authors Garland and Tadeja offer a critical analysis of today's emerging technology, while also addressing the need for collaborative efforts of parents, community, and students to implement technologies effectively. Special Features Include: Full integration of National Technology Standards for Administrators (NETS.A) and the National Education Technology Plan (NETP). Leader reflections from practicing school administrators that provide context of real-world scenarios. "Tips for School Leaders" and end-of-chapter questions that encourage student engagement with the text. "School Administrator's Technology Leadership Self-Assessment," a unique and impartial survey in each chapter with self-scoring guide that helps readers determine their technology use and readiness for implementation. A robust companion website with PowerPoint Slides, strategies, and links to website and video resources which will reflect changes in technology, policy, and practice. Discussion of the newest and emerging technologies, including Cloudware, social media, virtual manipulatives, and e-games. Educational Leadership and Technology is an important resource for new and aspiring elementary, middle, and high school principals as well as superintendents and technology coordinators.

Children in today's world are inundated with information about who to be, what to do and how to live. But what if there was a way to teach children how to manage priorities, focus on goals and be a positive influence on the world around them? The Leader in Me is that programme. It's based on a hugely successful initiative carried out at the A.B. Combs Elementary School in North Carolina. To hear the parents of A. B Combs talk about the school is to be amazed. In 1999, the school debuted a programme that taught The 7 Habits of Highly Effective People to a pilot group of students. The parents reported an incredible change in their children, who blossomed under the programme. By the end of the following year the average end-of-grade scores had leapt from 84 to 94. This book will launch the message onto a much larger platform. Stephen R. Covey takes the 7 Habits, that have already changed the lives of millions of people, and shows how children can use them as they develop. Those habits -- be proactive, begin with the end in mind, put first things first, think win-win, seek to understand and then to be understood, synergize, and sharpen the saw -- are critical skills to learn at a young age and bring incredible results, proving that it's never too early to teach someone how to live well.

Stay a step ahead of technological change so that every student can flourish! Students and classrooms are growing more technologically savvy every semester, and falling behind is not an option. This new edition of an essential text shows educational leaders how to equip their students for the future, with updates such as: Digital developments of the past decade that school leaders must address New content covering the Common Core, distributed leadership, adult learning theory, digital citizenship, cybersecurity, cloud computing, and more A new chapter on creating a "culture of technology" that goes beyond mere user manuals to create responsible, tech-savvy students

Digital Leaders are Made-Not Born "Fail forward, fail fast, fail better is a winning concept from Qualman's latest book, Digital Leader." -- Tony Hsieh, New York Times bestselling author and CEO of Zappos.com, Inc. "People with a passion for something can be infectious. It's obvious that Erik Qualman's passion is social media." -- Dan Heath, New York Times bestselling author of Made to Stick and Switch "Qualman is to social media what Deming is to quality and Drucker to management." -- Scott Galloway, professor, Stern School of Business, NYU "Erik Qualman is a Digital Dale Carnegie." -- Todd Young, CEO, ProspX About the Book: "Digital footprints are what we post about ourselves. Digital shadows are what others upload about us. Collectively, they have changed the world forever. As leaders and future leaders we need to adapt to this new world." -- from Digital Leader Digital leaders are made, not born--you have it within you to become an effective digital leader. As a leader in the digital age, your reach is boundless. With advanced technologies, you can exert more direct and indirect influence than ever before--anywhere at any time. And everything you do, fail to do, and wish you didn't do is documented forever in the digital universe. Digital Leader explains how to take full advantage of everything the digital age has to offer, while avoiding common pitfalls that can damage your "digital legacy." Bestselling author Erik Qualman explains what modern leadership means and describes how to be an effective leader in the digital world. In order to succeed, you need to adjust your leadership skills to adapt to today's digitally open world--and you need to start today. Qualman breaks the process down into five powerful truths you can use to establish your leadership "stamp": Simple: success is the result of simplification and focus True: be true to your passion Act: nothing happens without action--take the first step Map: goals and visions are needed to get where you want to be People: success doesn't happen alone Basing his conclusions on a wide range of research and resources, Qualman provides an abundance of real-world examples and tips to help you create a path to success while leading others to achieve their best.

UnCommon Learning techniques set the stage for mastery and true student engagement Integrate digital media and new applications with purpose and build a culture of learning with pleasure! Let students use real-world tools to do real-world work and develop skills society demands. Be the leader who creates this environment. UnCommon Learning shows you how to transform a learning culture through sustainable and innovative initiatives. It moves straight to the heart of using innovations such as Makerspaces, Blended Learning and Microcredentials. Included in the book: Vignettes to illustrate key ideas Real life examples to show what works Graphs and data to prove initiatives' impact

There is no simple strategic method for dealing with the multidimensional nature of digital change. Even the sharpest leaders can become disoriented as change builds on change, leaving almost nothing certain. Yet to stand still is to fail. Enterprises and leaders must re-master themselves to succeed. Leaders must identify the key macro forces, then lead their organizations at three distinct levels: industry, enterprise, and self. By doing this they cannot only survive but clean up. Digital to the Core makes the case that all business leaders must understand the impact the digital revolution will continue to play in their industries, companies, and leadership style and practices. Drawing on interviews with over 30 top C-level executives in some of the world's most powerful companies and government organizations, including GE, Ford, Tory Burch, Babolat, McDonalds, Publicis and UK Government Digital Service, this book delivers practical insights from those on the front lines of major digital upheaval. The authors incorporate Gartner's annual CIO and CEO global survey research and also apply the deep knowledge and qualitative insights they have acquired as practitioners, management researchers, and advisors over decades in the business. Above all else, Raskino and Waller want companies and their top leaders to understand the full impact of digital change and integrate it at the core of their businesses.

Social media holds great potential benefits for schools reaching out to our communities, preparing our teachers, and connecting with our kids. In this short text, the authors examine how enterprising schools are using social media tools to provide customized professional development for teachers and to transform communication practices with staff, students, parents, and other stakeholders.

With all that we know about how students learn, the nature of the world they will face after graduation, and the educational inequities that have existed for centuries, maintaining a traditional, one-size-fits-all approach to teaching and learning is tantamount to instructional malpractice. International security, the success of global economies, and sustainability as a global society all depend on the success of our education system in the years to come. It's our obligation to prepare our students for their future--not our past. Authors Eric C. Sheninger and Thomas C. Murray outline eight keys--each a piece of a puzzle for transforming the K-12 education system of teaching and learning--to intentionally design tomorrow's schools so today's learners are prepared for success . . . and stand ready to create new industries, find new cures, and solve world problems. The traditional model of schooling ultimately prepares students for the industrial model of the past. If we want our students to become successful citizens in a global society, we must dramatically shift to a more personal approach. Failure is not an option. We can no longer wait. Let Learning Transformed show you how you can be a part of the solution. The authors encourage you to use the hashtag #LTK8keys to continue the discussion online.
