English learners are not offered adequate support to succeed in STEM-related areas necessary for college and careers. This book provides a research-based and a critical pedagogical framework using project-based learning methodology and classroom-tested CALL programs to address this need.

Today's most pressing challenges require behaviour change at many levels, from the city to the individual. This book focuses on the collective influences that can be seen to shape change. Exploring the underlying dimensions of behaviour change in terms of consumption, media, social innovation and urban systems, the essays in this book are from many disciplines, including architecture, urban design, industrial design and engineering, sociology, psychology, cultural studies, waste management and public policy. Aimed especially at designers and architects, Motivating Change explores the diversity of current approaches to change, and the multiple ways in which behaviour can be understood as an enactment of values and beliefs, standards and habitual practices in daily life, and more broadly in the urban environment.

"English is an important subject today. It is also a difficult subject to teach. Large heterogeneous classes, anachronistic syllabi, boring textbooks boringly taught and purposeless examinations demotivate students from taking English seriously at college. In the twenty-first century there is a need for professionals to be adept at writing, speaking and understanding English because they have to communicate well with native English-speaking clients. Our graduates need to be trained in these linguistic competencies while in college. Unlock their Future: A Skills-based Approach to Teaching and Learning English offers practical methods and strategies for preparing students from the metros as well as the small towns in English language skills required in their professional lives. The authors sincerely hope that this book will bring freedom to many English-shy students and corporates and make this a standard for teaching of English language. Contents: •Introduction Viney Kirpal and Shridhar B. Gokhale • Spoken English: Some Remarks on the Teaching of Spoken English and Conversational English Shridhar B. Gokhale • How Much English Speech Does a Teacher Need? Teaching Spoken English and the Indian Teacher Sudhakar Marathe • Computer Assisted Language Learning T. Cambridge Global English (1-6) is a six-level Primary course following the Cambridge Primary English as a Second Language Curriculum Framework developed by Cambridge English Language Assessment. Teacher's Resource 6 provides step-by-step guidance notes for teachers for each lesson in every unit to support teaching the content of Learner's Book 6. Notes on Activity Book 6 are also included. A unit overview provides a snapshot of lesson objectives and the language and skills covered. The notes include answer keys to activities in the Learner's Book and Activity Book, complete audio scripts, suggestions for differentiation and assessment, cross-curricular links, portfolio opportunities and additional unit-linked photocopiable activities and unit-based wordlists.

Words form the building blocks of our thought processes. Because of this, our choice of wording can be vital to our ways of thinking. Building on this concept, Dr. Prudent Injeeli' Mind Your Words: Master the Art of Learning and Teaching Vocabulary presents groundbreaking work in the study of language and linguistics, particularly in the field of semantics. It offers a wide variety techniques and methods of learning and teaching vocabulary and provides essential information on many aspects of word knowledge, word formation and word usage. Injeeli addresses a number of topics that open a new world of knowledge about words, their origin, their structure and pronunciation, and so on. He also includes vocabulary lists developed by prominent linguists for enhancing vocabulary skills. Mind Your Words: Master the Art of Learning and Teaching Vocabulary shares insight into the morphological and semantic aspects of word knowledge that can help anyone understand the concepts involved in the language arts. You can gain knowledge about language and improve the skills needed to share that knowledge with others.

English learners are not offered adequate support to succeed in STEM-related areas necessary for college and careers. This book provides a research-based and a critical pedagogical framework using project-based learning methodology and classroom-tested CALL programs to address this need.

The main aim of this book is to connect in a straightforward way the growing body of second language vocabulary research with teacher actions in classrooms. Words are pervasive in our life. The words that we use express and shape our identity. Our vocabulary gives away our social and educational background. It is a major factor in determining what we understand. It opens or closes access to sources of information that will impact our future. Today vocabulary acquisition is considered an integral area of language teaching by linguists, teachers and researchers. They have come to understand the role of lexicon in language learning and communication. Therefore during the past three decades, the field of second language acquisition has seen renewed interest in vocabulary learning. But the scene was different few decades ago. For many years vocabulary was considered unimportant in language teaching. Its neglect in part may be due to specialisation in linguistic research on syntax and phonology. This may have fostered a climate in which vocabulary was considered an unimportant element in the learning of a second or foreign language. This view largely dominated the 1940's, 1950's and 1960's. The period between 1940-60 was an uncertain period for vocabulary as an aspect of language teaching. In this period vocabulary was seen mainly as a problem of selection and gradation for the target learners. It was only in 1970's that vocabulary was given some place of importance in language teaching but still it was considered less important when compared with syntax and phonology. For years, second language learners have complained about their lack of vocabulary in their new language. During this time, experts in our field did not give much importance to vocabulary. However, since the mid-1990s there has been a renewed interest in research on second language vocabulary issues such as student needs, teaching techniques, learner strategies, incidental learning and vocabulary for specific purpose. Today lexical knowledge is acknowledged to be central to communicative competence and the acquisition and development of second language. This study is probably the first systematic attempt to expand the students' active vocabulary and to create word-consciousness in the classroom. The aim of the present study is to examine students' knowledge of vocabulary at the college level and note the problem areas and follow the eclectic method to increase the students' word power in order to enable them to use more precise words instead of general ones. The students are taught words in lexical sets for quick expansion of vocabulary and they are also made to consider the paradigmatic and syntagmatic relations of words for better understanding of word meanings. Chapter I of this book deals with English as an international language and its position in India today. It also highlights the importance of vocabulary, aspects of vocabulary and the principles of selection and gradation of vocabulary. Chapter II reviews the work already done in the field of vocabulary. Chapter III focuses on the aims and procedure adopted in the present study. It also highlights techniques of teaching new words and expanding vocabulary. Chapter IV presents an analysis of the data collected. The relative difficulty level of different questions in the pre-test and the post-test, the students' progress in the use of vocabulary and the conclusions of the study are presented in this chapter. I sincerely hope that the present study and the discussions will have an impact on the way teachers and learners view the teaching and learning of vocabulary in a second language.
