FSIS has posted on its website an outbreak investigations overview and summaries of outbreaks investigated during fiscal years (FY) 2017, 2018, and 2019. The overview provides information about how FSIS is notified about outbreaks, the types of information FSIS evaluates to help inform Agency actions, and how FSIS captures and applies outbreak lessons learned.

~~Foodborne diseases | Food Standards Agency~~

INTRODUCTION The foodborne outbreaks occurred in last decades highlight the importance of the development and implementation of preventive measures and programs aiming at ensuring food safety on one hand and constituting a common basis for the hygienic production of food on the other hand. In particular, a farm to fork approach has been applied in all sectors of food production chain in order ...
