Sine, Cosine, Tangent Real World Applications. How to use ...

Sine, Cosine and Tangent. And Sine, Cosine and Tangent are the three main functions in trigonometry.. They are often shortened to sin, cos and tan.. The calculation is simply one side of a right angled triangle divided by another side... we just have to know which sides, and that is where "sohcahtoa" helps. For a triangle with an angle θ , the functions are calculated this way:

Sohcahtoa: Sine, Cosine, Tangent

Solution : Now we need to find the height of the side AB. $\sin \theta = \text{Opposite side}/\text{Hypotenuse side}$. $\sin \theta = AB/AC$. $\sin 60^\circ = AB/100$. $\sqrt{3}/2 = AB/100$. $(\sqrt{3}/2) \times 100 = AB$. $AB = 50 \sqrt{3}$ m. So, the height of kite from the ground $50 \sqrt{3}$ m.
