2.8 Figure 2 sets out the bursary rates for academic year (AY) 2014/15. These are relevant to (AY) 2014/15 only and do no t provide assurances about any future bursary rates. We advise against providers giving any assurance to potential trainees on future bursary rates until these are released by the Department for Business Innovation and Skills.

This open access book presents the major outcomes of the fourth edition of the Future of Higher Education – Bologna Process Researchers Conference (FOHE-BPRC 4) which was held in January 2020 and which has already established itself as a landmark in the European higher education environment. The conference is part of the official calendar of the European Higher Education Area (EHEA) for events that promote and sustain the development of EHEA. The conference provides a unique forum for dialogue between researchers, experts and policy makers in the field of higher education, all of which is documented in this proceedings volume. The book focuses on the following five sub-themes: Furthering the Internationalization of Higher Education: Particular – Challenges in the EHEA - Access and Success for Every Learner in Higher Education - Advancing Learning and Teaching in the EHEA: Innovation and Links With Research - The Future of the EHEA - Principles, Challenges and Ways Forward - Bologna Process in the Global Higher Education Arena. Going Digital? While acknowledging the efforts and achievements so far at EHEA level, the Paris Ministerial Communiqué highlights the need to intensify cross-disciplinary and cross-border cooperation. One of the ways to achieve this objective is to develop more efficient peer-learning activities, involving policymakers and other stakeholders from as many member states as possible for which this book provides a platform. It acknowledges the importance of a continued dialogue between researchers and decisionmakers and benefits from the experience already acquired, this way enabling the higher education community to bring its input into the 2020. European Higher Education Area (EHEA) priorities for 2020 onwards, European Higher Education Area: Challenges for a New Decade marks 21 years of Bologna Process and 10 years of EHEA and brings together an unique collection of contributions that not only reflect on all that has been achieved in these years, but more importantly, shape directions for the future. This book is published under an open access CC BY license.

Chapters in this volume discuss the impact of statewide political transformation on teacher education programs.

Education in the Arab World is a critical reference guide to development of education in Algeria, Bahrain, Egypt, Iraq, Jordan, Kuwait, Lebanon, Libya, Morocco, Oman, Palestine, Qatar, Saudi Arabia, Sudan, Syria, Tunisia, the United Arab Emirates and Yemen. The chapters, written by local experts, provide an overview of the education system in each country, as well as discussion of educational reforms and socio-economic and political issues. Including a comparative introduction to the issues facing education in the region as a whole, this book is an essential reference for researchers, scholars, international agencies and policy-makers.

The ICAEM2014 aims to bring together researchers, educators and students from around the world in both industry and academia for sharing the state-of-art research results and applications, for exploring new areas of research and development, and for discussing emerging issues on education and management fields. We received a total of 312 submissions from various parts of the world. The Technical Program Committee worked very hard to have all papers reviewed before the review deadline. The final technical program consists of 92 papers. There are one keynote speech and 2 invited sessions. The proceedings were published by DEStech Publications, Inc. and will submitted to Ei Compendex databases for indexing. We would like to mention that, due to the limitation of the conference venue capacity, we are not able to include many fine papers in the technical program. Our apology goes to those authors.

The four-volume set LNCS 11746–11749 constitutes the proceedings of the 17th IFIP TC 13 International Conference on Human-Computer Interaction, INTERACT 2019, held in Paphos, Cyprus, in September 2019. The total of 111 full papers presented together with 55 short papers and 48 other papers in these books was carefully reviewed and selected from 385 submissions. The contributions are organized in topical sections named: Part I: accessibility design principles; assistive technology for cognition and neurodevelopment disorders; assistive technology for mobility and rehabilitation; assistive technology for visually impaired; co-design and design methods; crowdsourcing and collaborative work; cyber security and e-voting systems; design methods; design principles for safety/critical systems. Part II: e-commerce; education and HCI curriculum I; education and HCI curriculum II; eye-gaze interaction; games and gamification; human-robot interaction and 3D interaction; information visualization; information visualization and augmented reality; interaction design for culture and development I. Part III: interaction design for culture and development II; interaction design for culture and development III; interaction in public spaces; interaction techniques for writing and drawing; methods for user studies; mobile HCI; personalization and recommender systems; pointing, touch, gesture and speech-based interaction techniques; social networks and social media interaction. Part IV: user modelling and user studies; user experience; users' emotions, feelings and perception; virtual and augmented reality I; virtual and augmented reality II; wearable and tangible interaction; courses; demonstrations and installations; industry case studies; interactive posters; panels; workshops.

Volume 2 of 2 - With more than 5,100 listings of grants programs from 1,880 sponsors, the Directory of Research Grants is a comprehensive directory of grants available to researchers in every field of study. The directory has a broad focus, featuring grants for basic research, equipment acquisition, building construction/renovation, fellowships, and 23 other program types. Government grants include CFDA, NSF and NIH program numbers. Each record includes grant title, description, requirements, amount, application deadline, contact information (phone, fax and email), web address, sponsor name and address, and samples of awarded grants (when available). Printed in two volumes, each with extensive indexes - subject, program type and geographic to help you to identify the right program quickly.

The E-Medicine, E-Health, M-Health, Telemedicine, and Telehealth Handbook provides extensive coverage of modern telecommunication in the medical industry, from sensors on and within the body to electronic medical records and beyond. Telehealth and Mobile Health is the second volume of this handbook. Featuring chapters written by leading experts and researchers in their respective fields, this volume: Discusses telesurgery, medical robotics, and image guidance as well as telenursing and remote patient care Describes the implementation of networks, data management, record management, and effective personnel training Explains how the use of new technologies brings many business, management, and service opportunities Provides examples of scientific advancements such as brain-controlled bionic human arms and hands Incorporates clinical applications throughout for practical reference The E-Medicine, E-Health, M-Health, Telemedicine, and Telehealth Handbook bridges the gap between scientists, engineers, and medical professionals by creating synergy in the related fields of biomedical engineering, information and communication technology, business, and healthcare.

Home to the largest per capita reserves and fourth-largest total reserves of crude oil within OPEC, Kuwait's public finances have suffered in 2016 following the rapid decline in oil prices, which drove oil revenues down from \$108.6bn in 2013 to \$51.8bn in 2015. Despite this Kuwait has resisted significant budgetary cutbacks: spending levels in 2016 were cut by just 1.6%, and the considerable financial buffers built up from budget surpluses in the years leading up to 2014 are expected to cushion the budget deficit. The country continues to push ahead with key public investments, with Parliament allocating \$155bn to the Kuwait Development Plan 2015-20 to fund infrastructure, utilities and housing developments. The plan focuses on further integrating the private sector into areas of the economy traditionally under state control and aims to raise the non-oil sector's GDP contribution to 64% in 2015-20, up from an average of 45.1% in 2010-13. Elsewhere promising moves are being made to cut state subsidies, with the government opting to liberalise diesel and kerosene prices and reduce subsidies on aviation fuel in January 2015, generating savings equal to 0.3% of GDP.

Academic exchange is one of the cornerstones of public diplomacy. Receiving foreign academics is one way of influencing foreign elites in an attempt to build goodwill and stable international networks. The result is that academic mobility and the internationalization of higher education and research have always been directly affected by foreign policy decisions and diplomatic considerations — and still are. In Public Diplomacy and Academic Mobility in Sweden, Andreas Åkerlund analyses Sweden's scholarship programs for foreign academics in a long-term perspective. Here a quantitative analysis of scholarship holders is related to Swedish exchange policy and grant practices by looking at the Swedish Institute in particular. The result is an account of how public diplomacy, foreign policy, development assistance, and the ideas of a knowledge-based economy and international competition affected academic exchanges with Sweden in the twentieth century.

This book constitutes the post-conference proceedings of the First International Conference on Smart Grid Inspired Future Technologies, SmartGIFT 2016, held in May 2016 in Liverpool, UK. Smart grid is the next generation electric grid that enables efficient, intelligent, and economical power generation, transmission, and distribution. The 25 revised full papers presented were reviewed and selected from 36 submissions. The papers cover technical topics such as high-level ideology and methodology, concrete smart grid inspired data sensing, processing, and networking technologies, smart grid system architecture, Quality of Service (QoS), energy efficiency, security in smart grid systems, management of smart grid systems, service engineering and algorithm design, and real-world deployment experiences.
