DON'T LET A WOMAN THROW YOU OFF AGAIN! Do you every try to approach a woman or do something for your girlfriend or wife, and she gives you a hard time? She makes snide comments or asks off-putting questions that make you feel like she's putting you through a hoop? That, my friend, is called a "Shit Test." The Shit Test is a very real phenomenon widely discussed by professional "pick-up artists" who teach that a Shit Test is a built-in psychological mechanism designed to test the man's mettle during a pick-up attempt or courtship. What they don't tell you is that the Shit Test is often used to mask the woman's own weaknesses and insecurities. Intended for men who are single or in a relationship, SURVIVAL OF THE SHITTEST will do more than help you pass Shit Tests with flying colors; it will transform your understanding of women to help you attract more women and keep the one you want!

The gripping tale of one man's survival in the wilderness. On the night of April 9, 1997, Warren Macdonald took his final step as a "complete" human being. A fit and experienced hiker, Macdonald had set out with a new Dutch companion to make the grueling climb to the top of Australia's spectacular Mount Bowen. They lost their way after a full day on the trail and pitched camp beside a narrow creek. Shortly after dusk, as he scrambled up an embankment away from the creek in the darkness, Macdonald was horrified to hear a loud crack. A second later he was lying in the creek bed, both his legs pinned by a giant boulder. What had begun as a two-day adventure had suddenly turned into a nightmare. Try as they might, the two men could not budge the massive piece of granite. There was nothing for it: Macdonald's companion would have to hike out at dawn and make a solitary, perilous descent—a journey of at least eight hours—to get help. A gifted storyteller, Macdonald captures the terror and high drama of his hours alone in the wilderness, but he also writes eloquently about his life both before and after the accident.
